#### DETAILED ACTION

#### Terminal Disclaimer

The terminal disclaimer filed on 3 October 2011 disclaiming the terminal portion

of any patent granted on this application which would extend beyond the expiration date

of US7,934,843 and 13/071169 has been reviewed and is accepted. The terminal

disclaimer has been recorded.

DOCKE.

#### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-18 and 20-27 are rejected under 35 U.S.C. 102(e) as being anticipated

by Lynam et al (hereafter "Lynam") US 2002/0072026.

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art

under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome

either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

the reference was derived from the inventor of this application and is thus not the

invention "by another," or by an appropriate showing under 37 CFR 1.131.

## Application/Control Number: 13/071,174 Art Unit: 2872

DOCKET

In regard to claim 1, Lynam discloses (see Figures 3-9) an exterior sideview mirror system suitable for use on an automobile, said exterior sideview mirror system comprising: an exterior sideview mirror assembly (12) adapted for attachment to a side of an automobile; said exterior sideview mirror assembly including a reflective element (30) having a rearward field of view when attached to the side of the automobile; said reflective element attached to an electrically-operated actuator (36) of said exterior sideview mirror assembly and movable by said actuator in order to position said rearward field of view to a driver-desired position when said exterior sideview mirror assembly is attached to the side of the automobile as described in paragraph [0036]; wherein said reflective element comprises a plano-auxiliary reflective element assembly, said piano-auxiliary reflective element assembly comprising a plano reflective element having unit magnification and a separate auxiliary reflective element having a curvature as described in paragraph [0015] and as shown in Figures 5A-5H; said plano reflective element and said auxiliary reflective element of said plano-auxiliary reflective element assembly mounted adjacently at said piano-auxiliary reflective element assembly in a side-by-side relationship and not superimposed with one reflective element on top of the other reflective element as shown in Figures 5a-5H; said plano reflective element and said auxiliary reflective element supported at a backing plate element (60, 160), said backing plate element mounting to said actuator such that movement of said backing plate element of said piano-auxiliary reflective dement assembly by said actuator simultaneously and similarly moves said plano reflective element and said auxiliary reflective element as described in paragraph [0042]; said

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
