HOW TO CHEAT AT VoIP Security

The Perfect Reference for the Multitasked SysAdmin

- Discover Why “Measure Twice, Cut Once” Applies to Securing a VoIP Infrastructure
- Learn How to Secure an Entire VoIP Infrastructure and Defend Against Denial-of-Service and Hijacking Attacks
- The Perfect Guide if VoIP Engineering is NOT Your Specialty

Thomas Porter
Michael Gough

Syngress Publishing, Inc., the author(s), and any person or firm involved in the writing, editing, or production (collectively "Makers") of this book ("the Work") do not guarantee or warrant the results to be obtained from the Work.

There is no guarantee of any kind, expressed or implied, regarding the Work or its contents. The Work is sold AS IS and WITHOUT WARRANTY. You may have other legal rights, which vary from state to state.

In no event will Makers be liable to you for damages, including any loss of profits, lost savings, or other incidental or consequential damages arising out from the Work or its contents. Because some states do not allow the exclusion or limitation of liability for consequential or incidental damages, the above limitation may not apply to you.

You should always use reasonable care, including backup and other appropriate precautions, when working with computers, networks, data, and files.

Contents

Chapter 1 Introduction to VoIP Security	1
Introduction2
The Switch Leaves the Basement4
What Is VoIP?6
VoIP Benefits6
VoIP Protocols8
VoIP Isn't Just Another Data Protocol9
Security Issues in Converged Networks11
VoIP Threats14
A New Security Model15
Summary16
Chapter 2 The Hardware Infrastructure	19
Introduction20
Traditional PBX Systems21
PBX Lines22
PBX Trunks24
PBX Features25
PBX Adjunct Servers28
Voice Messaging28
Interactive Voice Response Servers29
Wireless PBX Solutions30
Other PBX Solutions30
PBX Alternatives30
VoIP Telephony and Infrastructure31
Media Servers31
Interactive Media Service: Media Servers32
Call or Resource Control: Media Servers32
Media Gateways33
Firewalls and Application-Layer Gateways34
Application Proxies34
Endpoints (User Agents)35
IP Switches and Routers38
Wireless Infrastructure38
Wireless Encryption: WEP38

Wireless Encryption: WPA2	39
Authentication: 802.1x	40
Power-Supply Infrastructure	41
Power-over-Ethernet (IEEE 802.3af)	41
UPS	42
Energy and Heat Budget Considerations	43
Summary	44
Chapter 3 Architectures	45
Introduction	46
PSTN: What Is It, and How Does It Work?	46
PSTN: Outside Plant	46
PSTN: Signal Transmission	49
T1 Transmission: Digital Time Division Multiplexing	49
PSTN: Switching and Signaling	55
The Intelligent Network (IN), Private Integrated Services, ISDN, and QSIG	56
ITU-T Signaling System Number 7 (SS7)	57
PSTN: Operational and Regulatory Issues	61
PSTN Call Flow	61
PSTN Protocol Security	64
SS7 and Other ITU-T Signaling Security	64
ISUP and QSIG Security	66
The H.323 Protocol Specification	67
The Primary H.323 VoIP-Related Protocols	68
H.225/Q.931 Call Signaling	71
H.245 Call Control Messages	75
Real-Time Transport Protocol	77
H.235 Security Mechanisms	78
Understanding SIP	82
Overview of SIP	83
RFC 2543 / RFC 3261	84
SIP and Mbone	85
OSI	85
SIP Functions and Features	87
User Location	88
User Availability	88
User Capabilities	88
Session Setup	89

Session Management 89
 SIP URIs 89
 SIP Architecture 90
 SIP Components 90
 User Agents 90
 SIP Server 91
 Stateful versus Stateless 92
 Location Service 92
 Client/Server versus Peer-to-Peer Architecture 93
 Client/Server 93
 Peer to Peer 94
 SIP Requests and Responses 94
 Protocols Used with SIP 97
 UDP 97
 Transport Layer Security 98
 Other Protocols Used by SIP 99
 Understanding SIP's Architecture 102
 SIP Registration 102
 Requests through Proxy Servers 103
 Requests through Redirect Servers 103
 Peer to Peer 104
 Instant Messaging and SIMPLE 105
 Instant Messaging 106
 SIMPLE 107
 Summary 109
Chapter 4 Support Protocols 111
 Introduction 112
 DNS 112
 DNS Architecture 113
 Fully Qualified Domain Name 114
 DNS Client Operation 115
 DNS Server Operation 116
 Security Implications for DNS 117
 TFTP 118
 TFTP Security Concerns 118
 TFTP File Transfer Operation 119
 Security Implications for TFTP 119
 HTTP 120
 HTTP Protocol 121

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
