(54) [Title of the invention] Preparation for external use on the skin

(57) [Abstract]

20

25

30

[Problem] To offer preparations for external use on the skin which have a synergically intensified activated oxygen species eliminating action, and can prevent skin ageing and injury caused by intra- and extracorporeal oxidation stress.

[Means for solving the problem] One or two or more selected from adenosine and derivatives thereof having a hydroxy radical eliminating action, and an activated oxygen species eliminating agent selected from hamamelitannin, extracts of witch hazel, oriental white

oak, Mongolian oak, horse chestnut, great burnet and tree peony, thioredoxin, thioredoxin reductase and a complex thereof and/or placental extract are used concomitantly, included in a base for an external preparation for use on the skin. Adenosine derivatives include adenosine monophosphate, adenosine diphosphate, adenosine triphosphate and cyclic adenosine monophosphate.

[Claim 1] Preparation for external use on the skin, constituted by containing one or two or more selected from adenosine and derivatives thereof, and hamamelitannin.

[Claim 2] Preparation for external use on the skin constituted by containing one or two or more selected from adenosine and derivatives thereof, and one or two or more extracts of a plant selected from witch hazel, (Hamamelis japonica Sieb. et Zucc., Hamamelis obtusata Makino, Hamamelis virginiana L.), oriental white oak (Ouercus serata Thunb.), Mongolian oak (Quercus Blume), horse crispula chestnut, (Aesculus hippocastanum L.), great burnet (Sanguisorba officinalis L.) and tree peony (Paeonia suffruticosa Andr.).

[Claim 3] Preparation for external use on the skin constituted by containing one or two or more selected from adenosine and derivatives thereof, and one or two or more of thioredoxin, thioredoxin reductase and a complex thereof,

[Claim 4] Preparation for external use on the skin constituted by containing one or two or more selected from adenosine and derivatives thereof, and one or two or more of thioredoxin, thioredoxin reductase and a complex thereof, and reduced nicotinamide adenosine nucleotide phosphate.

[Claim 5] Preparation for external use on the skin constituted by containing one or two or more selected from adenosine and derivatives thereof, and a placental extract.

[Claim 6] Preparation for external use on the skin according to claim 1 to claim 5, characterized in that

the adenosine derivatives are adenosine monophosphate, adenosine diphosphate, adenosine triphosphate and cyclic adenosine monophosphate.

5 [Detailed Description of the Invention]

[0001]

10

15

20

25

[Technical field of the invention] The present invention relates to preparations for external use on the skin, which have a synergically intensified activated oxygen species eliminating action and can prevent skin ageing and injury caused by intra- and extracorporeal oxidation stress. More specifically, it relates to preparations for external use on the skin constituted by concomitant use of adenosine and derivatives thereof, and (a) constituent(s) having an activated oxygen species eliminating action.

[0002]

[Prior art] UV radiation and the internal metabolism of the body produce as activated oxygen species predominantly hydrogen peroxide, and hydroxy radicals, singlet oxygen and superoxide, within the body; it is well known that these have various adverse effects on the body. In relation in particular to skin tissue, it has been suggested that such activated oxygen species are profoundly associated with skin ageing phenomena such as wrinkle formation and modification of dermal constituents, as well as peroxidation of skin lipids.

[0003] In order to prevent or improve skin ageing and injury caused by such activated oxygen species, substances which eliminate these have been screened for a long time, and vitamin E group compounds, or plant tannins such as tea tannin, carotenoids, or other animal or plant extract constituents, etc., have been

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
