Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

DETAILED ACTION

1. This application is being examined under pre-AIA status.
2. This office action is given an identifier, Paper No. 20150311, for reference purposes only.

Status of Claims

3. Claims 1-26 remain cancelled by claim amendments filed 26 February 2015. Therefore, claims 27-61 are allowed in this office action.

Terminal Disclaimer

4. The filed Terminal Disclaimer was approved by The PTO on 10 March 2015.

Reason for Allowance

5. The following is an examiner's statement of reasons for allowance:

Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found within the Original Specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, ... the inventor's lexicography must prevail" *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.

Art Unit: 3668

Regarding claim 27, the prior art taken either individually or in combination with other prior art of record fails to disclose, suggest, teach, or render obvious the invention as a whole:

A system for authenticating identities of a plurality of users, the system comprising:
a first handheld device including:

- a first processor, the processor programmed to authenticate a user of the first handheld device based on authentication information and to retrieve or receive first biometric information of the user of the first handheld device;
- and

- a first wireless transceiver coupled to the first processor, and programmed to transmit via a network a first wireless signal including first authentication information of the user of the first handheld device; and

a second device including:

- a second processor;
- a second wireless transceiver coupled to the second processor, and
- a second memory coupled to the second processor, and

wherein the second device is configured to retrieve or receive respective second authentication information for a first plurality of users, wherein the first plurality of users includes the user of the first handheld device;

wherein the first processor is programmed to determine the first authentication information derived from the first biometric information and to transmit the first authentication information of the user of the first handheld device to the second device via the network,

wherein the second processor is configured to:

- receive the first authentication information of the user of the first handheld device;

- retrieve or receive the second authentication information of the user of the first handheld device; and

- use the first authentication information and the second authentication information to authenticate an identity of the user of the first handheld device with the second device.

Regarding claim 36, the prior art taken either individually or in combination with other prior art of record fails to disclose, suggest, teach, or render obvious the invention as a whole:

A computer implemented method of authenticating an identity of a first entity, comprising acts of:

Art Unit: 3668

authenticating, with a first handheld device, a user of the first handheld device as the first entity based on authentication information;
retrieving or receiving first biometric information of the user of the first handheld device;
determining a first authentication information from the first biometric information;
receiving with a second device, the first authentication information of the first entity wirelessly transmitted from the first handheld device;
retrieving or receiving respective second authentication information for the user of the first handheld device; and
authenticating the identity of the first entity based upon the first authentication information and the second authentication information.

Regarding claim 47, the prior art taken either individually or in combination with other prior art of record fails to disclose, suggest, teach, or render obvious the invention as a whole:

A system for authenticating identities of a plurality of users, the system comprising:
a first handheld device including:

- a first biometric sensor configured to receive a first biometric provided by a first user of the first handheld device;
- a first processor programmed to authenticate the first user of the first handheld device based on first biometric information; and
- a first wireless transceiver coupled to the first processor and programmed to transmit via a network a first wireless signal including first authentication information of the user of the first handheld device; and

a second device including:

- a second processor;
- a second wireless transceiver coupled to the second processor, and
- a second memory coupled to the second processor and configured to store respective information for a first plurality of users;

wherein the first handheld device is programmed to transmit the first authentication information of the first user of the first handheld device that is derived from the first biometric information to the second device via the network,

wherein the second processor

- is configured to receive the first authentication information of the user of the first handheld device, and
- is configured to retrieve second biometric information of the user of the first handheld device from stored biometric information of the first plurality of users or receive the second biometric information with the second wireless

Art Unit: 3668

transceiver so as to authenticate an identity of the first user of the first handheld device with the second device using the first authentication information and the second biometric information.

Regarding claim 56, the prior art taken either individually or in combination with other prior art of record fails to disclose, suggest, teach, or render obvious the invention as a whole:

A method of authenticating an identity of a first entity, comprising acts of:
authenticating, with a first handheld device, a first user of the first handheld device based on first biometric information provided by the first user;
in response to authenticating the first user of the first handheld device, transmitting a first wireless signal including first authentication information of the first user derived from the first biometric information;
receiving with a second device, the first wireless signal including the first authentication information of the first user;
receiving or retrieving from a memory second biometric data of the first user from biometric information for a first plurality of users stored in the memory, and receiving the second biometric data of the first user at the second device;
authenticating with the second device the identity of the first entity based upon the first authentication information and the second biometric information.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
