

## Exhibit C for U.S. Patent No. 9,445,251 Against Apple Accused Products

and iMessage services and Apple’s internal servers hosting Apple Messages and iMessage data and services, as well as servers providing Apple with data and services for use with Apple Messages and iMessage data and services.

AGIS does not concede that any claims of the ’251 Patent that are not listed below are not infringed by the Accused Products. Moreover, the citations to certain documents and other information below are intended to be exemplary only and in no way preclude AGIS from citing or relying on additional documents, information, source code, and/or testimony at a later time. These contentions are preliminary in nature, and an analysis of Apple’s products, internal documentation, source code, and/or testimony from witnesses may more fully and accurately describe the infringing features of its accused products. Accordingly, AGIS reserves the right to supplement, correct, modify, and/or amend these contentions once such additional information is made available. Furthermore, AGIS reserves the right to supplement, correct, modify, and/or amend these contentions as discovery progresses; in view of the Court’s claim construction order(s); in view of any positions taken by Apple, including but not limited to positions on claim construction, invalidity, and/or non-infringement; and in connection with the preparation and execution of expert reports.

<p><b>US9445251B2</b></p> <p>1[P]. A computer-implemented method comprising:</p>	<p><b>Apple</b></p> <p>The <b>Accused Products</b> include Apple’s iOS-based devices, e.g. iPhones, iPads, and iPods, and non-iOS-based devices, e.g. Apple Watches. These devices implement the method as follows.</p> <p>Each of the Accused Products is a first device programmed to perform operations as set forth in the claims. The Accused Devices is programmed to perform these operations by Apple via Apple’s iOS-based devices and associated apps provided by Apple.</p> <p>For example, the Accused Products are programmed with application frameworks such as CoreLocation, which provide device-location features to iOS and/or applications running on iOS.<sup>1</sup> (e.g. iMessage, Family Sharing, and Find My Friends). iOS is integrated with centralized features and/or services (e.g. iCloud and Maps). Alternatively, any device with a browser or device-location application can access device-location features through iCloud.com.</p>

	<p data-bbox="609 737 1032 869">Find everybody's devices.</p> <p data-bbox="609 913 1065 1182">Finding your family's lost devices is easier when everyone can help. With Family Sharing and Find My iPhone, any family member can help locate another member's missing device. Their devices appear in a single list in the Find My iPhone app. So it's easier than ever to track down a misplaced or stolen iPhone, iPad, or Mac.</p> <p data-bbox="565 1224 1175 1251"><b>See <a href="http://www.apple.com/icloud/family-sharing/">http://www.apple.com/icloud/family-sharing/</a></b></p> <p data-bbox="609 1304 1019 1346">Getting set up is simple.</p> <p data-bbox="609 1377 1624 1440">You can use Family Sharing on your iPhone, iPad, or iPod touch with iOS 8 or later, your Mac with OS Yosemite or later and iTunes 12, or your PC with <a href="#">iCloud for Windows</a>.</p> <ul data-bbox="609 1476 1624 1612" style="list-style-type: none"><li>• On your iPhone, iPad, or iPod touch, go to Settings &gt; iCloud, tap <a href="#">Set Up Family Sharing</a>, then follow onscreen steps.</li><li>• On your Mac, go to Apple menu &gt; System Preferences &gt; iCloud, click <a href="#">Set Up Family</a>, then follow onscreen steps.</li></ul> <p data-bbox="565 1644 1149 1671"><b>See <a href="https://support.apple.com/en-us/HT201060">https://support.apple.com/en-us/HT201060</a></b></p>

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
