Subject: Unified reaches 100 challenges

#2 PTAB Filer for 2017

#6 PTAB Filer of All Time

Unified Patents has filed more than 100 challenges against poor-quality NPE patents since 2013. Our actions have resulted in hundreds of free licenses, deterred litigations, and many millions of dollars in nuisance settlement and litigation fees saved. All without paying NPEs a dime.

With the support of our more than 180 members, Unified has filed more independent challenges, cancelled more claims, and deterred more nuisance assertions than all other third parties ... COMBINED.

And we're just getting started. Watch what we do in 2018, as we innovate new ways to improve patent quality, deter NPE litigation, and incentivize true innovation.

General Patent Corporation patent determined likely invalid

On October 10, Unified's IPR was instituted on all challenged claims on a patent owned by Kamatani Cloud, a subsidiary of General Patent Corporation. The '940 Patent, on measurement systems was asserted against Animetrics, Inc.
