▼ About this capture

It says here, "The Internet is the future of business." We should be on it.

Adobe PageMaker 6.5
🌈 or 🎨

Looks count. If you still don't know how to go from fool to cool without losing your head, you've come to the right place. Now you can make pages sing and images fly as well as find the answers to:

"How do I manipulate images without spending 2 months rent on Photoshop?"

"What do I need to turn my printed pages into web pages?"

"Can I make a Duotone out of a B&W; pictures without brain surgery?"

PrintShop Deluxe III

"How do I seperate good type from all the hype?"
