## Company Information

Broderbund was founded by Doug and Gary Carlston in 1980, when the personal computer software industry was still in its infancy. The brothers established the company in order to market Galactic Empire and Galactic Trader, computer game programs Doug had written in his spare time when he wasn't practicing law.

By the summer of 1980, after forming an alliance with the Japanese software house StarCraft, the company was able to market a substantial line of home entertainment products. Before the end of its third year, Broderbund had moved from Eugene, Oregon, to California's Marin County, had grown to more than 40 employees and was selling millions of dollars' worth of software annually.

Cathy Carlston, Doug and Gary's sister, joined the company in 1981. Until her departure in 1989, she served as vice president of educational market planning and was instrumental in formulating Broderbund's marketing efforts to schools. Gary Carlston, the firm's first CEO, also left in 1989 to pursue other interests. In 1987, Ed Auer joined the company as senior vice president, chief operating officer and director after a 23-year tenure at CBS, Inc. He was appointed president in

About this capture

William McDonagh, who had been the company's CEO, was named president and chief operating officer in 1994. Today, Doug Carlston is still actively involved in the company and serves as chairman and CEO. Although the company now employs more than 450 employees, Carlston and McDonagh still manage to retain a corporate culture that allows plenty of room for individuality and creativity at any level. It's still a company where executives can be found eating lunch with groups everyday in the cafeteria and where each Friday concludes with a company - wide meeting to trade ideas and socialize.

## Support Information

If you have not yet registered your product, don't worry, you can register over the phone! One of our friendly customer support representatives will gladly assist you!

### Before calling Technical Support, please follow these steps.

1. Check your manual thoroughly. Happily, many solutions turn out to be in the manual.
2. Gather all information that applies to the problem. Note or print out any on-screen messages you get when the problem occurs.
3. Write down all the steps you have taken to solve the problem, along with any error messages your computer has given you.
4. Be sure you know your hardware configuration, operation system version, memory, monitor type, etc.
5. When you call, please be in front of your computer with the power on. Have on hand your manual, product disks and your product registration number.

Phone: **415-382-4700** or Fax: **415-382-4419**  
**Monday through Thursday 6:00 am - 4:30 pm and**  
**Friday from 6:00 am - 3:45 pm Pacific Time**
