

UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE PATENT TRIAL AND APPEAL BOARD

APPLE INC.,
Petitioner

v.

COREPHOTONICS, LTD.
Patent Owner

Case No. IPR2018-01133
U.S. Patent No. 9,538,152

PETITIONER'S REPLY

Table of Contents

I. Introduction.....1

II. Claim Construction.....1

 A. No construction is necessary for the term “*point of view*.”.....1

III. The evidence of record supports the Border/Parulski combination.2

 A. Patent Owner mischaracterizes Border’s image stitching and image registration.2

 1. Patent Owner oversimplifies Border’s image stitching.3

 2. Patent Owner incorrectly limits Border’s image registration to a “simple homography registration.”5

 B. Patent Owner misrepresents Petition’s use of Parulski in the combination.7

 1. Petitioner relies on Border for establishing a primary/non-primary image relationship.....8

 2. Petition relies on Parulski’s image combination teachings for obtaining an output image using primary/non-primary images.9

 C. A POSITA would have understood why and how to combine Border with Parulski’s generating an enhanced primary image using a secondary image.11

 1. Patent Owner’s “addition” of Parulski’s “primary/non-primary image designation step” to Border is unnecessary because Border itself establishes the primary/non-primary relationship...11

 2. Modifications to Border to accommodate Parulski’s teachings would have been within the skill of a POSITA.12

IV. Border and Parulski render claims 1 and 3 obvious.....14

 A. The Border/Parulski combination renders obvious [1.10]: “*wherein if $FOV_2 < FOV_{ZF} < FOV_1$ then the point of view of the output image is that of the first camera.*”15

 1. Patent Owner’s importation of extraneous requirements into the claim language “*the point of view of the output image is that of the first camera*” should be rejected.....15

2.	Border teaches this limitation.	16
3.	The Border/Parulski combination teaches this limitation.....	20
B.	The Border/Parulski combination renders obvious [1.11]: “ <i>the processor further configured to register the overlap area of the second image as non-primary image to the first image as primary image to obtain the output image.</i> ”	22
1.	Patent Owner’s importation of extraneous requirements into the claim language “ <i>register the overlap area...to obtain the output image</i> ” should be rejected.....	22
2.	Border teaches the partial claim limitation “ <i>configured to register the overlap area...to obtain the output image.</i> ”	23
3.	The Border/Parulski combination teaches this limitation.....	25
V.	Border and Parulski render claims 2 and 4 obvious.....	27
A.	Border teaches that if $FOV_2 \geq FOV_{ZF}$, then the processor is further configured to provide an output image from a point of view of the second camera.	27
B.	The Border/Parulski combination renders claims 2 and 4 obvious. ...	28
VI.	Conclusion	30
VII.	Certificate of Word Count	31
	CERTIFICATE OF SERVICE	32

PETITIONER'S EXHIBIT LIST

APPL-1013 (New)	Supporting Declaration of Dr. Oliver Cossairt, under 37 C.F.R. § 1.68 ("Cossairt Supp.")

I. Introduction

The Petition and record as a whole provide detailed reasons why the cited art renders the challenged claims of the '152 patent obvious. None of the arguments in the Response adequately refute the evidence of record.

Patent Owner's arguments fail because they import unclaimed limitations into the claims, mischaracterize Border's teachings regarding image stitching and image registration, and disregard Parulski's teachings for modifying a primary image using a secondary image to generate an enhanced primary image. In fact, Patent Owner attempts to recast Petitioner's Border and Parulski obviousness ground as Border-only anticipation (Response, 26n2 and 27) for the claim limitations in dispute. As discussed below, Patent Owner's arguments are incorrect, unsupported, and should be rejected.

II. Claim Construction

A. No construction is necessary for the term "*point of view*."

Patent Owner "believes that the term 'point of view' requires no construction," but proposes that "[s]hould the Board conclude that it is necessary to construe 'point of view,' that term should be construed as 'camera angle.'" Response, 13. Because Patent Owner fails to explain why construing the term "*point of view*" is necessary and states that it believes that the term 'point of view' requires no construction, no construction is necessary for the term "point of view." APPL-1013, ¶¶2-3.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
