Do you recognize this as a copy of your supplemental declaration that you submitted in this
2 3 4 5 6 7 8 9	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR?
2 3 4 5 6 7 8 9 10	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning?	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes.
2 3 4 5 6 7 8 9 10 11	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes.	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document?
2 3 4 5 6 7 8 9 10 11 12	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes.
2 3 4 5 6 7 8 9 10 11 12 13 14	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning?	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of?
2 3 4 5 6 7 8 9 10 11 12 13 14 15	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No.	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but
2 3 4 5 6 7 8 9 10 11 12 13 14 15	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No. Q. This deposition pertains to your	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but it's possible there are typos.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No. Q. This deposition pertains to your supplemental declaration testimony in four IPR	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but it's possible there are typos. Q. Any opinions you'd like to change?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No. Q. This deposition pertains to your supplemental declaration testimony in four IPR matters all pertaining to U.S. Patent Number	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but it's possible there are typos. Q. Any opinions you'd like to change? A. No.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No. Q. This deposition pertains to your supplemental declaration testimony in four IPR matters all pertaining to U.S. Patent Number 8,698,558.	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but it's possible there are typos. Q. Any opinions you'd like to change? A. No. Q. Okay. You can set that one aside.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No. Q. This deposition pertains to your supplemental declaration testimony in four IPR matters all pertaining to U.S. Patent Number 8,698,558. Is that your understanding?	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but it's possible there are typos. Q. Any opinions you'd like to change? A. No. Q. Okay. You can set that one aside. MR. SAUER: I've now handed the witness
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No. Q. This deposition pertains to your supplemental declaration testimony in four IPR matters all pertaining to U.S. Patent Number 8,698,558. Is that your understanding? A. Yes.	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but it's possible there are typos. Q. Any opinions you'd like to change? A. No. Q. Okay. You can set that one aside. MR. SAUER: I've now handed the witness Exhibit 1127 in IPR2018-0153.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	APSEL PROCEEDINGS ALYSSA B. APSEL, Ph.D., having been first duly sworn on oath, was examined and testified as follows: EXAMINATION BY MR. SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No. Q. This deposition pertains to your supplemental declaration testimony in four IPR matters all pertaining to U.S. Patent Number 8,698,558. Is that your understanding? A. Yes. MR. SAUER: And for the record those IPR	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but it's possible there are typos. Q. Any opinions you'd like to change? A. No. Q. Okay. You can set that one aside. MR. SAUER: I've now handed the witness Exhibit 1127 in IPR2018-0153. Q. Do you recognize this as a copy of your

SAUER: Q. Please state your name for the record. A. Alyssa Apsel. Q. And, Dr. Apsel, you understand you're under oath this morning? A. Yes. Q. And is there any reason that you can't testify fully and truthfully this morning? A. No. Q. This deposition pertains to your supplemental declaration testimony in four IPR matters all pertaining to U.S. Patent Number 8,698,558. Is that your understanding? A. Yes.	APSEL A. Yes. I don't remember the numbers, but Q. That's fine. A I believe you. Q. I am handing you Intel Exhibit 1027 in IPR2018-01152. Do you recognize this as a copy of your supplemental declaration that you submitted in this IPR? A. Yes. Q. Did you write this document? A. Yes. Q. Did you write this document? A. Yes. Q. Are there any errors that you're aware of? A. There are not errors I'm aware of, but it's possible there are typos. Q. Any opinions you'd like to change? A. No. Q. Okay. You can set that one aside. MR. SAUER: I've now handed the witness Exhibit 1127 in IPR2018-0153. Q. Do you recognize this as a copy of your

	Page 6		Page 7
1	APSEL	1	APSEL
2	A. Yes.	2	in this IPR?
3	Q. Any errors in this one or corrections?	3	A. Yes.
4	A. I found a typo. I can't remember exactly	4	Q. You wrote this one?
5	where it is. Oh no, I don't there is one	5	A. Yes.
6	typo in here that found, but I can't remember where	6	Q. Any corrections?
7	it is actually. I thought that was it. But for	7	A. No.
8	the most part this expresses my opinion.	8	Q. Okay. You can keep this one in front of
9	Q. And no opinions you'd like to change?	9	you if you don't mind. If you'll turn to page 13,
10	A. No.	10	paragraph 25.
11	Q. Okay. Set that one aside, too.	11	Are you there?
12	There you go. I'm now handing you	12	A. Yes.
13	Exhibit 1329 in IPR2018-01240.	13	Q. In paragraph 25 you state, first sentence:
14	Do you recognize this as a copy of your	14	"Second, any decrease in the linear amplifier
15	reply declaration in this IPR?	15	current, Ia, caused by Kwak's feedforward path is
16	A. Yes.	16	balanced by an identical increase in the inductor
17	Q. You wrote this one, too?	17	current Id," correct?
18	A. Yes.	18	Did I read that correctly?
19	Q. Any errors that you'd like to change,	19	A. Yes.
20	opinions you'd like to change?	20	Q. And then a couple of sentences later you
21	A. No.	21	state, "Therefore because Io=Ia+Id and because Io
22	Q. Okay. Set that one aside.	22	remains unchanged, if Ia decreases, Id must
23	One more. And now I've handed you	23	increase by the identical amount."
24	Exhibit 1228 in IPR2018-01154.	24	Is this your testimony?
25	Is this a copy of your reply declaration	25	A. Yes.
	Page 8		Page 9
1	APSEL	1	APSEL
2	Q. Okay.	2	Q. And Ia in the equation is the current
3	MR. SAUER: I'm handing the witness what's	3	shown at the bottom right portion of Figure 2,
4	been previously marked as Intel Exhibit 1011.	4	correct?
5	Q. Do you recognize this as a copy of the	5	A. Correct.
6	Kwak reference?	1	A. Correct.
		6	Q. And you refer to that in some places in
7	A. Yes.	6 7	
8	Q. Take a look at Figure 5.	6 7 8	Q. And you refer to that in some places in
8	Q. Take a look at Figure 5. Are you there?	7	Q. And you refer to that in some places in your declaration as a linear amplifier, correct?A. Correct.Q. If you can flip back a page to Figure 2 in
8 9 10	Q. Take a look at Figure 5.Are you there?A. Yeah.	7 8	Q. And you refer to that in some places in your declaration as a linear amplifier, correct?A. Correct.
8 9 10 11	Q. Take a look at Figure 5.Are you there?A. Yeah.Q. The equation that you refer to in your	7 8 9	Q. And you refer to that in some places in your declaration as a linear amplifier, correct?A. Correct.Q. If you can flip back a page to Figure 2 in
8 9 10 11 12	Q. Take a look at Figure 5.Are you there?A. Yeah.Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the	7 8 9	 Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's
8 9 10 11 12 13	 Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is 	7 8 9 10	 Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b),
8 9 10 11 12 13 14	Q. Take a look at Figure 5.Are you there?A. Yeah.Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right?	7 8 9 10 11 12	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct?
8 9 10 11 12 13 14 15	 Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. 	7 8 9 10 11 12 13	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes.
8 9 10 11 12 13 14 15	 Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing 	7 8 9 10 11 12 13	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last
8 9 10 11 12 13 14 15 16	 Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing through the load ZI at the bottom right-hand part 	7 8 9 10 11 12 13 14	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last deposition, each of the currents in this equation
8 9 10 11 12 13 14 15 16 17	Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing through the load Zl at the bottom right-hand part of the circuit, correct?	7 8 9 10 11 12 13 14 15	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last deposition, each of the currents in this equation are complex variables both with a magnitude
8 9 10 11 12 13 14 15 16 17 18	Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing through the load ZI at the bottom right-hand part of the circuit, correct? A. Correct.	7 8 9 10 11 12 13 14 15 16	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last deposition, each of the currents in this equation are complex variables both with a magnitude component and a phase component, correct?
8 9 10 11 12 13 14 15 16 17 18 19 20	Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing through the load Zl at the bottom right-hand part of the circuit, correct? A. Correct. Q. And Id is the current flowing through the	7 8 9 10 11 12 13 14 15 16 17	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last deposition, each of the currents in this equation are complex variables both with a magnitude component and a phase component, correct? A. Yes.
8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing through the load Zl at the bottom right-hand part of the circuit, correct? A. Correct. Q. And Id is the current flowing through the inductor L, correct?	7 8 9 10 11 12 13 14 15 16 17 18	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last deposition, each of the currents in this equation are complex variables both with a magnitude component and a phase component, correct? A. Yes. Q. And in Figure 2(b) of Kwak, the magnitude
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing through the load Zl at the bottom right-hand part of the circuit, correct? A. Correct. Q. And Id is the current flowing through the inductor L, correct? A. Correct.	7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last deposition, each of the currents in this equation are complex variables both with a magnitude component and a phase component, correct? A. Yes. Q. And in Figure 2(b) of Kwak, the magnitude components of the current variables are represented
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing through the load ZI at the bottom right-hand part of the circuit, correct? A. Correct. Q. And Id is the current flowing through the inductor L, correct? A. Correct. Q. And you also refer to this current as the	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last deposition, each of the currents in this equation are complex variables both with a magnitude component and a phase component, correct? A. Yes. Q. And in Figure 2(b) of Kwak, the magnitude components of the current variables are represented by the length of the arrows or vectors in the phase
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Take a look at Figure 5. Are you there? A. Yeah. Q. The equation that you refer to in your declaration, Io equals Ia plus Id relates to the operation of the circuits shown in Figure 5; is that right? A. Correct. Q. And specifically Io is the output flowing through the load Zl at the bottom right-hand part of the circuit, correct? A. Correct. Q. And Id is the current flowing through the inductor L, correct? A. Correct.	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. And you refer to that in some places in your declaration as a linear amplifier, correct? A. Correct. Q. If you can flip back a page to Figure 2 in Kwak, the equation that you refer to Io=Ia+Id, it's also reflected by the phase diagram in Figure 2(b), correct? A. Yes. Q. And as we talked about in your last deposition, each of the currents in this equation are complex variables both with a magnitude component and a phase component, correct? A. Yes. Q. And in Figure 2(b) of Kwak, the magnitude components of the current variables are represented by the length of the arrows or vectors in the phase diagram; is that right?

Page 14 Page 15 1 1 APSEL APSEL 2 2 linear amplifier current Ia, correct? can add -- those sines and cosines can add in phase 3 3 A. Yes. or out or phase, it's not exactly telling you how 4 Q. But in your complex equation, that means a 4 the sum of those currents is changing necessarily. 5 5 decrease in the magnitude component of Ia, correct? Q. So it would be fair to say that Figure 5 6 of Kwak just doesn't give you enough information to A. Yes, that's correct. 7 7 know what happens to the phase of Ia? Q. It doesn't necessarily mean a decrease in 8 8 MR. TOMPROS: Object to form. the phase component of Ia? 9 9 A. So this is -- I have a little bit of a A. No. I don't think that that's correct 10 10 problem with the way this is being posed. either. I think that the -- talking about the 11 11 Q. Okay. How so? phase of Ia is a little strange because it is a 12 12 combination of sines and cosines with different A. Just because that assumption when we're 13 13 talking about the magnitude in phase of the sine phases, that's what I'm trying to say. 14 14 waves, we're talking about a single frequency Q. Okay. But are you able to tell from Kwak 15 15 component, whereas the full signal, what is coming or Figure 5 what happens to that combination of 16 16 out of Io is very unlikely to be a single phaser, a sines and cosines in Ia? 17 17 single frequency component. It's likely to be a A. There is a goal in this circuit of 18 18 combination, a sum of sines and cosines at speeding up the response of the switcher, which is 19 19 different frequencies with a broad range of -- we can talk about the phase increasing or 20 20 decreasing, but it's difficult to say that it's a frequency content. 21 21 So we can talk about a single frequency, single phase or of a single component because it's 22 22 like single component of that, that's saying that really an aggregate signal. 23 23 the phase and magnitude are changing in a certain Q. An aggregate of the phases of different 24 24 way, but it's not exactly telling you how the components? 25 25 A. Yes. current -- the sum of the currents, because they Page 16 Page 17 1 1 APSEL APSEL 2 Q. And it may increase in one place and 2 exactly how much the phase is changing for one 3 3 decrease in another; is that what you're saying? component versus the other, but I think it's 4 4 A. Yes. Or more likely increase more in some certainly knowable. 5 places and less in others; it's that sort of Q. In any of your calculations with respect 6 6 relationship. to Kwak, have you ever calculated any of those 7 7 values from that equation? Q. So in your equation, when the feedforward 8 8 path is introduced into Kwak's Figure 3 --A. I don't understand that question. 9 9 Figure 5, we know the magnitude and phase Q. You said it's knowable. Have you 10 10 components of the output current stay the same. determined those values from Kwak? Have you 11 11 A. Yes. determined what happens to those components when 12 12 Q. And we know that the magnitude component the feedforward path is introduced in Figure 5? 13 13 of the linear amplifier current decreases. A. I can look at the circuit behavior and I 14 14 A. Yes. can look at what the feedforward path is doing. So 15 15 Q. But there's still three unknown variables the feedforward path is adding to this summation 16 in that equation; isn't that right? 16 block in Figure 5, and acts to change the signal 17 A. I'm not sure I understand that. 17 going into this thresholding block. It increases 18 18 Q. Well, based on the complex equations it relative to -- it increases the negative input 19 19 you've written, when the feedforward path is relative to the positive input, right? So it 20 20 introduced into Figure 5, we don't know what changes the output of this switching thresholding 21 happens to the magnitude and phase component of Id 21 block, which we -- it's easy to see and understand 22 22 or the phase component of Ia; isn't that right? that that changes the duty cycle of the switcher. 23 23 They're unknown variables. And changing the duty cycle of the switcher changes 24 24 A. I'm not sure that that can't be known. I the slope of the current of Id, which means that it 25 don't look at the circuit immediately and know 25 will increase the current of Id.

DOCKET A L A R M

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
