**UNITED STATES INTERNATIONAL TRADE COMMISSION
WASHINGTON, D.C. 20436**

In the Matter of

**CERTAIN MOBILE ELECTRONIC
DEVICES AND RADIO FREQUENCY
AND PROCESSING COMPONENTS
THEREOF**

Investigation No. 337-TA-1065

INITIAL DETERMINATION AND RECOMMENDED DETERMINATION

Administrative Law Judge Thomas B. Pender

Pursuant to the notice of investigation, 82 Fed. Reg. 37899 (Aug. 14, 2017), this is the initial determination on violation and recommended determination on remedy and bonding in *Certain Mobile Electronic Devices and Radio Frequency and Processing Components Thereof*, United States International Trade Commission Investigation No. 337-TA-1065.

It is held that a violation of section 337 of the Tariff Act, as amended, has occurred in the importation into the United States, the sale for importation, or the sale within the United States after importation, of certain mobile electronic devices and radio frequency and processing components thereof, with respect to asserted claim 31 of U.S. Patent No. 9,535,490.

I. Background.....	1
A. Institution of the Investigation.....	1
B. Procedural History.....	2
C. The Private Parties.....	3
D. Ownership of the Asserted Patents.....	4
II. Jurisdiction and Importation.....	4
III. The '558 Patent.....	5
A. Claim Construction.....	5
B. Infringement.....	6
1. General Principles of Law.....	6
2. The '558 Accused Products.....	8
3. Claim 6.....	9
a. An apparatus for wireless communication, comprising: a power amplifier operative to receive and amplify an input radio frequency (RF) signal and provide an output RF signal; and.....	9
b. a supply generator operative to receive an envelope signal and a first supply voltage, to generate a boosted supply voltage having a higher voltage than the first supply voltage, and to generate a second supply voltage for the power amplifier based on the envelope signal and the boosted supply voltage,.....	9
c. wherein the supply generator incorporates an operational amplifier (op-amp) operative to receive the envelope signal and provide an amplified signal,.....	10
d. a driver operative to receive the amplified signal and provide a first control signal and a second control signal,.....	10

1. The '936 Accused Products	40
2. Claim 19.....	41
a. A device comprising: a controller.....	41
b. configured to receive a graphics instruction for execution within a programmable streaming processor,	41
c. wherein the indication of the data precision is contained within the graphics instruction and	42
d. wherein the graphics instruction is a first executable instruction generated by a compiler that compiles graphics application instructions,	42
i. Literal Infringement	42
ii. Doctrine of Equivalents	45
e. to receive an indication of a data precision for execution of the graphics instruction, and to receive a conversion instruction that, when executed by the programmable streaming processor, converts graphics data associated, with the graphics instruction, from a first data precision to converted graphics data having a second data precision, wherein the conversion instruction is different than the graphics instruction and wherein the conversion instruction is generated by the compiler; and	48
f. a plurality of execution units within the processor,	52
g. wherein the controller is configured to select one of the execution units based on the indicated data precision and cause the selected execution unit to execute the graphics instruction with the indicated data precision using the converted graphics data associated with the graphics instruction.	52
3. Claim 25.....	52
a. The device of claim 19,.....	52

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
