## I. INTRODUCTION

Petitioners Hulu, LLC, Amazon.com, Inc., and Netflix, Inc. request *inter partes* review of claims 15-30 of U.S. Patent No. 8,934,535 (Ex. 1001). The '535 Patent refers to methods for compressing data with an asymmetric data compressor. According to the '535 Patent, these techniques aim to increase the storage/retrieval bandwidth of mass storage devices which traditionally suffer from “profound read/write data rate limitations” that “severely limit” data-dependent applications. Ex. 1001 at 2:53-61.

But the techniques of the '535 Patent were known in the prior art well before the priority date of the '535 Patent. Specifically, to obtain allowance of claim 27, the Applicant added the feature of using “asymmetric data compression” to differentiate from anticipatory art, while independent claim 15 recited “asymmetric compressors” as filed. Ex. 1002 at 435, 411.<sup>1</sup> Asymmetric compression algorithms, however, were widely used in the compression field and extensively described in the prior art. Ex. 1003 at 74-78; *see, e.g.*, Ex. 1005; Ex. 1007.

---

<sup>1</sup> Issued independent claim 15 was prosecuted as original claim 12 and issued independent claim 27 was prosecuted as original claim 28. Ex. 1002 at 597.
