USA SPEC IPOD to Car Interfaces

Ipod to Car Stereo Interfaces

Connect, Charge, Control and Play and IPOD through OEM factory radios!

Connects an Ipod to your factory radio and operates it just like a CD Changer.

Use your Ipod to easily create up to 5 custom mobile or favorite play list. Then, access, play and control each favorite play list with your factory radio's CD Changer control buttons. Simple, safe and easy to use.

The radio will display the favorite play list number 1 to 5 and song number 1 - 99, just like a CD Changer does. Each play list can hold an unlimited number of songs.

- All plug and play harnesses for easy installation
- Adds additional basic single Aux input.
- True Digital Quality sound through factory radio
- Factory Radio CD Changer operates the IPOD just like CD Changer
- Use the Radio's CD Changer controls to access and control up to 5 different mobile play list. Song up down, shuffle, random etc.
- Access unlimited song per each mobile play list
- Auto memory feature – Auto locates last song of each play list
- Auto Skip 10+ songs in each play list with factory CD Changer FF button
- Auto skip to end of play list with factory CD Changer FF button
- Auto Maintain current play list when migrating from portable to in car use
- Auto Charge feature charges IPOD battery and auto stops after 1 hour of non use
- Uses CD Changer Port, If Vehicle has existing CD Changer it must be disconnected.
- All required Cables included, nothing else to buy!
