1 **I. INTRODUCTION**

2 1. My name is John Villasenor. I have been retained by counsel for
3 Plaintiff, Qualcomm, Inc. (“Qualcomm”), as an expert in this litigation to provide
4 opinions concerning certain claim terms in U.S. Patent No. 8,971,861 (the ’861
5 Patent), U.S. Patent No. 8,768,865 (the ’865 Patent), and U.S. Patent No. 8,447,132
6 (the ’132 Patent).
7

8 2. I am being compensated at a rate of \$800 per hour for time spent on this
9 matter. I am also being reimbursed for expenses that I incur during the course of this
10 work. My compensation is not contingent upon the results of my study, the substance
11 of my testimony, or the outcome of this case.
12

13 **II. BACKGROUND AND QUALIFICATIONS**

14 3. My work focuses on innovative, high-performance communications,
15 networking, media processing, and computing technologies and their broader
16 implications. Since well before the respective priority dates of the ’132, ’865, and
17 ’861 Patents, I have performed research in areas including image processing, machine
18 learning, and delivering content to mobile devices. For example, at UCLA I created
19 and have on many occasions taught courses in image processing that address, among
20 other topics, techniques used in object detection and dynamic range correction. I have
21 also performed research in image processing, and published many papers on various
22 aspects of image processing. I have also done research in machine learning, with
23 substantial experience developing algorithms that adapt in response to changing
24 characteristics in the environment as reflected, for example, through data measured
25 through sensors. In addition, I have performed research in relation to mobile devices
26 since the 1990s. This research included multiple aspects of mobile devices, including

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
