

Apple Inc. (Petitioner)  
v.  
Qualcomm Incorporated (Patent Owner)  
Petitioner Demonstratives

Case Nos. IPR2018-01281 & IPR2018-01282

U.S. Patent No. 8,768,865

Before Hon. Daniel N. Fishman, Michelle N. Wormmeester, and

Amanda F. Wieker

Administrative Patent Judges

# Table of Contents

---

## **1. Wang-based grounds prevail under correct claim construction**

- 1A. Wang discloses using Table 1 to identify states
- 1B. Wang discloses using both Table 1 and XML file to identify states

## **2. Petitioner correctly construes “fixing” limitations**

- 2A. Fixing is construed by Petitioner, not removed
- 2B. Petitioner’s construction of fixing is distinct of identifying
- 2C. PO’s construction imports extraneous limitations

## **3. Wang-based grounds prevail even under PO’s narrow construction**

- 3A. Wang discloses additional mappings satisfying the claims
- 3B. Petitioner’s reliance on additional mappings are timely and complete

## **4. Louch-based grounds prevail even under PO’s narrow construction**

- 4A. Louch’s 1<sup>st</sup> mapping under the learning mode theory satisfies the claims
- 4B. A POSITA would appreciate Louch’s “duration” pattern includes a “first pattern”
- 4C. Louch discloses setting the scope of analysis for confirming a “duration”

## **5. Dependent claims are addressed by both Wang and Louch**

- 5A. [Claims 4&23] Wang discloses alleged causation
- 5B. [Claims 4&23] Louch discloses recognizing 2<sup>nd</sup> pattern in a reduced set of parameters
- 5C. [Claims 5,24&48] Louch discloses taking “snapshots” in response to detecting condition

# Overview of the '865 Patent

FISH

# '865 Patent Overview

- U.S. Patent No. 8,768,865 (the "865 Patent") claims an earliest priority date of 01/19/2011.
- The '865 Patent includes 53 claims, of which claims 1, 21, 31 and 46 are independent.
- The '865 Patent's claims are directed generally toward machine learning of situations via pattern matching or recognition for use in or with mobile communication devices.
- IPR2018-01281 challenges the '865 Patent's claims 1-6, 8-25, 27-30, 46-49, 51-53.
- IPR2018-01282 challenges the '865 Patent's claims 1-10, 12-30, 46-53.

# '865 Patent: Claim 1

---

## '865 Patent

1. A method comprising:
  - monitoring, at a mobile device, input signals from a plurality of information sources associated with said mobile device;
  - detecting at least one condition based, at least in part, on at least one of said monitored input signals;
  - identifying a first pattern based, at least in part, on said at least one detected condition; and
  - fixing a subset of varying parameters associated with said first pattern by associating at least one parameter of said subset of varying parameters with said first pattern to represent said at least one detected condition, said varying parameters derived, at least in part, from said monitored input signals.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
