

IPR2018-01555 and IPR2018-01581  
Patent 7,848,439

**UNITED STATES PATENT AND TRADEMARK OFFICE**

---

**BEFORE THE PATENT TRIAL AND APPEAL BOARD**

---

HTC CORPORATION, HTC AMERICA, INC.,  
and APPLE INC.,  
Petitioner

v.

INVT SPE LLC,  
Patent Owner

---

Case IPR2018-01555 and Case IPR2018-01581

United States Patent No. 7,848,439 B2

---

**DECLARATION OF DR. BRANIMIR VOJCIC  
IN SUPPORT OF PATENT OWNER'S RESPONSE**

I, **BRANIMIR VOJCIC**, hereby declare as follows:

1. I am competent to testify, and, if called upon during an *Inter Partes* Review (IPR) proceeding, would do so. If called upon as a witness, I could competently testify to the truth of each statement herein.

2. I was asked to provide an opinion on the Petitions asserted in IPR2018-01555 and IPR2018-01581, regarding U.S. Patent No. 7,848,439 ('439 patent) (Ex. 1001), statements made in those Petitions, and exhibits in support of the Petition, including the two declarations of Dr. Zhi Ding. In particular, I was asked to provide an opinion on a combination of the Li patent (Ex. 1003), the Vijayan patent (Ex. 1004), and the Hashem patent (Ex. 1005), as well as a combination with all three of the foregoing with the Cioffi patent (Ex. 1006).

3. My opinion is based upon my knowledge and experience, and my review of the '439 patent, the Petitions, and exhibits in support of the Petitions. I understand that the Board consolidated certain portions of the proceedings related to both Petitions. Because of the substantial overlap between the two Petitions and Ding declarations, the exemplary citations in this declaration will refer to the exhibits and papers from the IPR2018-01555 proceeding, unless I specify otherwise, but shall be equally applied to the IPR2018-01581 proceeding where appropriate.

## **I. BACKGROUND**

4. I am an expert in wireless technology and other areas of telecommunications, signal processing, and electrical engineering. I am presently a Professor Emeritus of Engineering and Applied Science at The George Washington University. I retired from the university in May 2015, where I was a member of the faculty since September 1, 1991. In addition, I have served as a consultant for a number of companies in the wireless communications industry in various technology areas. I have also served on numerous committees and as a reviewer and editor for several journals, conferences, and organizations.

5. I am presently President of Xplore Wireless, LLC, a small telecommunication consulting company. I am also a co-founder, Director, CEO and CTO of LN2, a startup in the telecommunication space.

6. I received my Diploma of Engineering, Master of Science, and Doctor of Science degrees in Electrical Engineering from the University of Belgrade in Yugoslavia in 1981, 1986, and 1989, respectively. The primary focus of my Doctor of Science studies was on Code Division Multiple Access (CDMA) and spread spectrum communications technologies.

7. In 1991, I joined The George Washington University as an Assistant Professor and was promoted to Associate Professor and Professor in 1997 and

2000, respectively. From 2001 to 2004, I served as the Chairman of the Electrical and Computer Engineering Department at The George Washington University. During my tenure at The George Washington University, until May 2015, I taught many different courses on communications theory and networks, wireless communications, and I was a course director for a number of courses in communications. I have supervised students mostly in the areas of communications and coding theory, wireless communications/networks, including CDMA (including IS-95, CDMA2000, WCDMA/HSDPA/HSUPA), and OFDM/LTE and have been a thesis director for a number of Doctor of Science candidates, who now have successful careers in academia, industry, and government.

8. My research in the areas I just mentioned has been supported by the communications industry and various Government agencies, such as the Advanced Research Project Agency (ARPA), National Science Foundation (NSF), and National Security Agency (NSA). Much of this research concerns communications theory, performance evaluation, modeling wireless networks, multi-user detection, adaptive antenna arrays, and ad-hoc networks.

9. I have authored or co-authored numerous journal and conference papers, contributed to various books, and served as a co-editor of a book on wireless communications, entitled “Multiaccess, Mobility and Teletraffic in

IPR2018-01555 and IPR2018-01581  
Patent 7,848,439

Wireless Communications, Volume III,” Kluwer Academic Publishers, Norwell, Massachusetts, 1998. My CV includes a detailed listing of my publications. Ex. 2002.

10. I have also received awards for my work. In 1995, I received the prestigious National Science Foundation Faculty Early CAREER Development Award. The award is given annually by NSF to a select group of young professors nationwide to promote excellence in teaching and research.

11. I have served as a consultant for numerous companies in the wireless communications industry in technology areas, in the areas of 2G/3G/4G mobile technologies, Wireless LANs, new generation broadcast systems, advanced mobile satellite systems and other aspects of modern communication systems. I have also taught academic courses as well as short courses for the industry and government on various aspects of communications in the areas of 2G, 2.5G, 3G, and 4G cellular standards.

12. I am a Senior Member of the IEEE and was an Associate Editor for IEEE Communications Letters and Journal on Communications and Networks. I served as a member of technical program committees, as a session organizer for many technical conferences and workshops, and as a reviewer of technical papers for many journals and conferences. These also include conference submissions on

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
