Betreff: Question re Design of error-control coding schemes for three problems of noisy information transmission, storage and processing

I would like to know when the thesis listed below was first publicly available for viewing or check out at the library? The name of the thesis is "Design of error-control coding schemes for three problems of noisy information transmission, storage and processing" by Willibrordus Johannes van Gils, with call number **DR 1111**. I know that it was published in 1988, but what I need to know is when it was first available for viewing at the library. Thank you for your help.
