

## Declaration of Rachel J. Watters on Authentication of Publication

I, Rachel J. Watters, am a librarian, and the Director of Wisconsin TechSearch (“WTS”), located at 728 State Street, Madison, Wisconsin, 53706. WTS is an interlibrary loan department at the University of Wisconsin-Madison. I have worked as a librarian at the University of Wisconsin library system since 1998. I have been employed at WTS since 2002, first as a librarian and, beginning in 2011, as the Director. Through the course of my employment, I have become well informed about the operations of the University of Wisconsin library system, which follows standard library practices.

This Declaration relates to the dates of receipt and availability of the following:

**Roccatano, D., Bizzarri, R., Chillemi, G., Sanna, N., & Di Nola, A. (1998). Development of a parallel molecular dynamics code on SIMD computers: Algorithm for use of pair list criterion. Journal of computational chemistry, 19(7), 685-694.**

Standard operating procedures for materials at the University of Wisconsin-Madison Libraries. When a volume was received by the Library, it would be checked in, stamped with the date of receipt, added to library holdings records, and made available to readers as soon after its arrival as possible. The procedure normally took a few days or at most 2 to 3 weeks.

Exhibit A to this Declaration is true and accurate copy of the journal cover with library date stamp of *Journal of computational chemistry* (1998), from the University of Wisconsin-Madison Library collection. Exhibit A also includes an excerpt of pages 685

Declaration of Rachel J. Watters on Authentication of Publication

to 694 of that volume, showing the article entitled *Development of a parallel molecular dynamics code on SIMD computers: Algorithm for use of pair list criterion* (1998).

Based on this information, the date stamp on the journal cover page indicates *Development of a parallel molecular dynamics code on SIMD computers: Algorithm for use of pair list criterion* (1998) was received by University of Wisconsin-Madison Libraries on April 27, 1998.

Based on the information in Exhibit A, it is clear that the volume was received by the library on or before April 27, 1998, catalogued and available to library patrons within a few days or at most 2 to 3 weeks after April 27, 1998.

I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

Date: August 7, 2018

**Manuscripts** should be submitted to one of the editors: Dr. Norman L. Allinger, *Journal of Computational Chemistry*, Department of Chemistry, The University of Georgia, Athens, GA 30602; Prof. Dr. Paul von R. Schleyer, *Journal of Computational Chemistry*, Computer Chemistry Center, Institut für Organische Chemie, Universität Erlangen-Nürnberg, Henkestr. 42, D-91054, Erlangen, Germany; or Prof. Gernot Frenking, *Journal of Computational Chemistry*, Fachbereich Chemie, Philipps-Universität Marburg, Hans-Meerwein-Strasse, D-35032 Marburg, Germany. Information for contributors appears in the first and last issue of each volume. All other correspondence should be addressed to *Journal of Computational Chemistry*, Publisher, Interscience Division, Professional Reference and Trade Group, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
