PRESCRIPTION.

LANTUS
insulin glargine (FDA approved) injection
SoloSTAR

HIGH BLOOD
SUGAR, YOU'RE
GOING DOWN.

Gary C. taking L

24-hour blood sugar help. In a once-daily pen.

Lantus® in the easy-to-use Lantus® SoloSTAR® pen can help provide 24-hour blood sugar control with just one shot a day. If you have type 2 diabetes and pills and exercise aren't enough, you have options. Rethink insulin. Insulin is an ally to help control your blood sugar. Talk to your doctor to see if Lantus® SoloSTAR® is right for you. Call 1.866.766.6414 or go to LantusControl.com.

Important Safety Information for Lantus® (insulin glargine)

Do not take Lantus® if you are allergic to insulin or any of the inactive ingredients. You must test your blood sugar levels while using insulin, such as Lantus®, of any type of insulin without talking to your healthcare provider. Any change in insulin should be under medical supervision.

Do NOT dilute or mix Lantus® with any other insulin or solution. It will affect your blood sugar control, which could be serious. Lantus® must only be used if the solution is visible. Do not share needles, insulin pens or syringes with others.

The most common side effect of insulin, including Lantus®, is low blood sugar. Some people may experience symptoms such as shaking, sweating, dizziness, and hypoglycemia may be serious and life threatening. It may cause harm to you if you do not recognize the symptoms. Other side effects may include injection site reactions, including changes in fat tissue at the injection site, itching and rash. In rare cases, some allergic reactions may be life threatening.

Tell your doctor about other medicines and supplements you are taking because they may interact with Lantus®. Before starting Lantus®, tell your doctor about all your medical conditions, problems, are pregnant or planning to become pregnant, or are breast-feeding.

Lantus® SoloSTAR® is a disposable prefilled insulin pen. Please talk to your doctor about the correct technique and follow instructions in the Instruction Leaflet that accompanies the pen.

Indications and Usage

Prescription Lantus® is a long-acting insulin used to treat adults with type 2 diabetes (and older) with type 1 diabetes for the control of high blood sugar. It should be used once a day to lower blood glucose.

Do not use Lantus® to treat diabetic ketoacidosis.

Please see brief summary of prescribing information on the next page.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1.800.FDA.1088.
