Reason for Allowance

The following is an examiner's statement of reasons for allowance: The applicant argues that Carrol fails to teach "receiving information representative of a configuration request". However, see Carrols fig. 3, item 320 (placing order). The placing of a order is inherently "information representative of a request". It is further specified that Carrol does not teach or suggest comparing the determined (requested) component and at least one additional component to at least one of an acceptable or an unacceptable list. Carrol, as indicated in the previous action compares the requested component with an acceptable list (one of an acceptable and an unacceptable list); however, he does not teach or suggest comparing an additional component with one of the list in response to a request. Therefore, the claims are allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
