

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent of: Haller, et al.
U.S. Patent No.: 7,039,033
Issue Date: May 2, 2006 Atty Docket No.: 39521-0020IP1
Appl. Serial No.: 09/850,399
Filing Date: May 7, 2001
Title: SYSTEM, DEVICE AND COMPUTER READABLE
MEDIUM FOR PROVIDING A MANAGED WIRELESS
NETWORK USING SHORT-RANGE RADIO SIGNALS

DECLARATION OF DR. SAYFE KIAEI

1. My name is Dr. Sayfe Kiaei. I understand that I am submitting a declaration in connection with *Inter Partes* Review proceedings before the United States Patent and Trademark Office for U.S. Patent Number 7,039,033 (“the ’033 Patent”).
2. I have been retained on behalf of Apple Inc. My compensation is not based on the outcome of my opinions.
3. My curriculum vitae (“CV”) is provided as Exhibit 1004.
4. I received a Bachelor of Science in Electrical Engineering from Washington State University in 1982; a Master’s of Science in Electrical and Computer Engineering from Washington State University in 1987; and a Ph.D. in Electrical and Computer Engineering from Washington State University in 1987.
5. I am a Professor in the School of Electrical, Computer and Energy Engineering Department at Arizona State University. I have held this position since 2001. From 2004 to 2017, I was also the Director of the National Science

Declaration of Dr. Sayfe Kiaei
U.S. Patent No.: 7,039,033
Atty Docket No.: 39521-0020IP1

Foundation Center “Connection One,” which is an industry/university cooperative research center with over thirty industrial members and five university members focused on developing communication system and networking technologies. I have graduated over 100 MS and PhD students working under my supervision on their thesis, and many of them are professors in academia, or have senior positions in the industry. Currently I have 8 MS, PhD and postdoc students working with in my lab on research related to communication and networking systems, wireless and wireline systems, RF, and integrated circuits. My research is funded by various industry, federal agencies including NSF, DARPA, ONR, DOE, etc., with an average research funding of \$1M per year.

6. I have been involved with communication and networking systems, wireless and wireline systems, cellular systems, RF, digital signal processing, and related areas for the last 30 years starting with the first generation of mobile phones (analog AMPS mobile phones), 2G, and 3G including GSM, EDGE, IS-95, 1X CDMA, Wide band CDMA, Bluetooth, GPS, Wireless LAN, and related areas. I designed the baseband communication system for Motorola’s Talkabout Radio of which over 100 million are currently in the market place. At Motorola, I designed systems for DSL, DMT, OFDM, wireline and wireless systems, wireless networking, 1G-3G, UMTS, GPS and Bluetooth systems.

Declaration of Dr. Sayfe Kiaei
U.S. Patent No.: 7,039,033
Atty Docket No.: 39521-0020IP1

7. From 1987 through 1993, I was a Professor at Oregon State University (tenured) in the Electrical and Computer Engineering Department. In my over thirty years of teaching experience, and have taught courses in networking, communication systems, RF, and electronics.

8. From 1993 to 2001, I was a Senior Member of Technical Staff with the Wireless Technology Center and Broadband Operations at Motorola Inc. where I was responsible for the development of wireless system, cellular system, RF integrated circuits, GPS, and Digital Subscriber Lines (DSL) transceivers. From 1985 through 1987, I worked with Boeing on the development of signal processing and control systems. I have also been a consultant on various projects with Intel (designing 2G, 3G cellular transceivers), Texas Instrument (developing 3G cellular and Bluetooth technologies), Sony Wireless (developing GPS technologies), Tektronics (designing wireless systems), and various other consultancies.

9. From 1997-2001 I was the standards technical analyst for Motorola and attended various standard-setting committees, including ITU, IEEE, and ETSI related to DSL, OFDM, CDMA, 2G, and 3G systems.

10. I have published over a hundred journal and conference papers covering topics such as communication systems, signal processing, radio frequency, integrated circuits (IC), filter design, and related areas.

Declaration of Dr. Sayfe Kiaei
U.S. Patent No.: 7,039,033
Atty Docket No.: 39521-0020IP1

11. I am an IEEE Fellow, a distinction and highest-level membership awarded for extraordinary accomplishments. I am a member of IEEE Circuits and Systems Society, IEEE Solid State Circuits Society, and IEEE Communication Society, IEEE RF and Microwave committees, IEEE Low Power Symposium Committee, IEEE Signal Processing Society, IEEE Fellow Selection Committee, and many other International Electrical Engineering societies. I was one of the key organizers to establish the IEEE Radio Frequency Integrated Circuits (RFIC) symposium in 1995 and have been on the executive committee, and technical committee of RFIC for the last 16 years. The RFIC Symposium has grown and is now the premier international symposium in the world where the latest RF circuits and components are presented. I have been involved in several international conferences in the areas of RF, Communication, Signal Processing, and IC design.

12. I have received several awards including the Carter Best Teacher Award; the IEEE Darlington Award (which is given for the best technical paper on circuits and systems in the IEEE CAS Society), and the Motorola 10X Rapid Design Cycle Reduction Award.

13. I have reviewed the '033 Patent, including the claims of the patent in view of the specification and the file history. In addition, I have reviewed the following documents:

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
