Subscription Rates

Annual Institutional Subscription Rates 1997: Europe, The CIS and Japan 2350.00 Dutch Guilders. All other countries US\$1451.00. Associated Personal Subscription rates are available on request for those whose institutions are library subscribers. Members of the Pattern Recognition Society will receive the journal free of charge as part of their membership to the Society. Dutch Guilder prices exclude VAT. Non-VAT registered customers in the European Community will be charged the applicable VAT in addition to the periodical. Prices include postage and insurance and are subject to change without notice.

PATTERN RECOGNITION

AIMS AND SCOPE

Pattern Recognition is the official journal of the Pattern Recognition Society. The Society was formed to fill a need for information exchange among research workers in the pattern recognition field. Up to now, we "pattern-recognitionophiles" have been tagging along in computer science, information theory, optical processing techniques, and other miscellaneous fields. Because this work in pattern recognition presently appears in widely spread articles and as isolated lectures in conferences in many diverse areas, the purpose of the journal **Pattern Recognition** is to give all of us an opportunity to get together in one place to publish our work. The journal will thereby expedite communication among research scientists interested in pattern recognition.

We consider pattern recognition in the broad sense, and we assume that the journal will be read by people with a common interest in pattern recognition but from many diverse backgrounds. These include high energy physics, target recognition, biological taxonomy, meteorology, space science, oceanography, character recognition, optical instrumentation, industrial applications, neuron physiology, and many others.

The publication policy is to publish (1) new original articles that have been appropriately reviewed by competent scientific people, (2) reviews of developments in the field, and (3) pedagogical papers covering specific areas of interest in pattern recognition. Various special issues will be organized from time to time on current topics of interest to Pattern Recognition.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Pattern Recognition Society if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

U.S. Copyright Law Applicable to Users in the U.S.A.

Photocopying Information for Users in the U.S.A. The Item-Fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of \$17.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 222 Rosewood Drive, Danvers, MA 01923, U.S.A.

Permission for other use. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such uses.

CONTENTS

SPECIAL ISSUE: IMAGE DATABASES

<i>J. C. M. Lee and A. Jain</i>	537	Editorial
<i>S. Gutta and H. Wechsler</i>	539	Face recognition using hybrid classifiers
<i>N. W. Campbell, W. P. J. Mackeown, B. T. Thomas and T. Troscianko</i>	555	Interpreting image databases by region classification
<i>T. P. Minka and R. W. Picard</i>	565	Interactive learning with a “society of models”
<i>N. V. Patel and I. K. Sethi</i>	583	Video shot deflection and characterization for video databases
<i>M. V. Srinivasan, S. Venkatesh and R. Hosie</i>	593	Qualitative estimation of camera motion parameters from video sequences
<i>J. D. Courtney</i>	607	Automatic video indexing via object motion analysis
<i>S. Sclaroff</i>	627	Deformable prototypes for encoding shape categories in image databases
<i>J. Zhang, J. Wu, D. Zhong and S. W. Smoliar</i>	643	An integrated system for content-based video retrieval and browsing
