- Obviousness analysis – Ground 1 (Bonomi + Borella)
- Obviousness analysis – Ground 2 (Chandran + Rupp)
- Obviousness analysis – Ground 3 (Teraslinna + Bonomi)

# Overview of '857 and '922 patents

(57)

## ABSTRACT

A method of dynamically managing transmission of packets is disclosed. The method, in some embodiments, may comprise establishing a network session over a communication link between a network and a user device of a user and associating a data transmission parameter with the user device. The method may further comprise receiving a packet and calculating a delay period associated with the packet based on the data transmission parameter and delaying transmission of the packet based on the delay period.

## Exemplary challenged claim

1. A system for allowing a user to dynamically control an amount of bandwidth available to the user in a network, the system comprising:

a first network interface for communicating over a communication link with a user device during a network session;

a second network interface for communicating with one or more computer networks;

a data storage system including an indication of a network communication bandwidth associated with the user device and selected by the user; and

a processor configured to calculate a delay period associated with a received packet based on the network communication bandwidth associated with the user, and the processor further configured to delay transmission of the packet based on the delay period to prevent the user device from achieving a bandwidth greater than the network communication bandwidth associated with the user device and selected by the user.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
