PROCEEDINGS

THE BAILIFF: The United States Court of Appeals for the Federal Circuit is now open and in session.

God save the United States and this Honorable Court.

JUDGE MOORE: Please, be seated. Good morning.

Our first case for today is 2015-1672, in RE:

NuVasive. Mr. Rosato, please proceed.

MR. ROSATO: Thank you, Your Honor. And I had reserved five minutes for rebuttal. May it please the Court. As Your Honor noted, this is an appeal from two inter partes reviews, the 2013 507, 508, both involving NuVasive's Patent No. 8187334, directed to lateral spinal fusion implants.

Respectfully, the board's finding of unpatentability should be reversed because the decision, both decisions in both of the IPRs errored by crafting and relying on new grounds of unpatentability in its final written decisions, while explicitly refusing to give NuVasive an opportunity to respond.

JUDGE MOORE: Well, is it really a new ground of unpatentability? It's Figure 18, correct? Is that what we're --

MR. ROSATO: Correct.

JUDGE MOORE: -- talking about? Of the same reference that was the ground of patentability that

was being considered. At all times it was obviousness of these particular references in combination. So why is it a new ground of patentability?

MR. ROSATO: It's a new ground because the theory of unpatentability and the thrust of the invention, had completely changed. It changed from one theory and a particular embodiment, to a completely different embodiment that quite frankly addresses or presents a type of implant that is fundamentally different, not only from the embodiment of the Michaelson disclosure that was originally relied upon, but every other single implant that was addressed or presented in any of the references.

JUDGE WALLACH: You're the one who, in your response before PTAB included Michaelson 16, 19 and 20. And 16 and 19 are on the same page. And in between them is 18. But you didn't include 18. Why not? That says something to me.

MR. ROSATO: Well, okay. Well, I'm interested to hear what that says. My explanation of that would be Figure 18 and Figure 19 are describing the same embodiment. Figure 18 shows one piece of a multi-piece assembly implant. So the point that was being made in the response, and it's a valid and unrebutted point, Your Honor, is that all of the

Page 4

implants in Michaelson are designed to be oversized, both in length and width. And that was the point.

JUDGE WALLACH: What, you're interested in what it says to me? It says when you exclude something from the body of a document, and it turns out that that information is relevant, then it tells me that if I were at a trial level anywhere, I would immediately say to myself, gee, what's in that hole.

MR. ROSATO: In the -- you know, it's a -- it's a fair question to want to know what's there. I don't think there was any intent to skip over things. The point that was being made --

JUDGE WALLACH: Well, of course there was. You left it out. It was left out. I mean --

MR. ROSATO: Well, I respectfully would submit the intent was not to hide anything, Your Honor. The point being made, and if you read the briefing on that point, was taking the petitions --

JUDGE WALLACH: You can take it. We read the briefing.

MR. ROSATO: Okay. I -- I feel very assured that that is the case. But the -- the argument that was being made was in response to what was presented in the petition. The petition case was resize the primary implants according to the dimensions of the

Page 5

Michaelson implant. And there was one implant cited in the petition. So taking that suggestion to its logical conclusion was the argument.

JUDGE WALLACH: Why wasn't Hynes asked about 18?

Because you were permitted below to cross examine him and file motions for observations and so on?

MR. ROSATO: So this gets to the issue of whether observations on cross examination after reply constitute an opportunity to respond. And they don't.

JUDGE TARANTO: Well, it's some opportunity. It just may not be enough opportunity.

MR. ROSATO: True.

JUDGE TARANTO: You can't put in your own evidence.

MR. ROSATO: Exactly.

JUDGE TARANTO: Right. So can I just focus on -on this? In one of the two Medtronic petitions, there
is a reference to -- what is it, Column 10, which -of -- of -- of Michaelson, which contains the
descriptions of 18 and 19. And let's just assume for
these purposes that 18 and 19 teach the same thing in
terms of a long and wide and narrow implant, each one
of them all by itself. Why was, just as to that,
which is -- is that the 507? That's the 507 IPR?

MR. ROSATO: I think it's the 507, right.

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
