TABLE OF CONTENTS

I. Introduction 1

II. Claim Interpretations 1

 A. “Coronal plane” path to spine (claims 1, 9, 17 and 24) 1

 B. “Elongated portion” (claims 9, 17 and 24) 1

 C. Implant length/vertebrae width ratio: “Substantially the full traverse width (claims 1, 9 and 17) and the “full transverse width” (claim 24) 2

III. Jacobson discloses a direct lateral approach that meets the “coronal plane” path limitation and teaches the insertion of a fusion implant (Claims 9-30: Ground 6) 6

IV. Brantigan ‘327 discloses the lateral insertion of an implant, and even if it didn’t, that is not necessary for obviousness (Claims 17-23: Grounds 3-4) 7

V. Brantigan ‘327 meets the “substantially the full transverse width of the vertebrae” claim limitation (at least Claims 17-23: Grounds 3-4) 9

VI. Michelson ‘247, when inserted laterally according to the teachings of Jacobson, would meet the “substantially” or “full” transverse width limitations (at least Claims 9-16 and 24-30: Grounds 1-2 and 5-6) 10

VII. Claims 24-30: If this Board interprets the claim 24 limitation of “full transverse width” different from claims 9 and 17, then either Michelson ‘247 meets claim 24 (under Grounds 5-6) or the validity of claims 24-30 under Ground 8 should be considered 11

VIII. The claimed “elongated portions” 12

IX. The “non-combinable” arguments of Warsaw have no merit 12

X. Warsaw’s secondary considerations arguments for patentability cannot pass scrutiny 13

XI. Conclusion 15
