Replacement Instructions:

- Disconnect the air chamber from the front of the ACS
- Trim the hose that is attached to the air chamber about 6-12 inches
- Insert the male connectors into the ends of the hoses. *(The end with the black o-ring should protrude from the hose.)* A small amount of soapy water can be used as a lubricant to help the connector slide into the hose
- Insert the new male connector of the air chamber hose into the new FCS female connectors until you hear the 'click'.
