Defendants.

Case No. 2:18-cv-01844 GW(KSx)

**DEFENDANTS' MEMORANDUM  
OF POINTS AND AUTHORITIES  
IN SUPPORT OF RENEWED  
MOTION TO STAY PENDING  
INSTITUTED *INTER PARTES* REVIEW  
PROCEEDINGS**

The Hon. George H. Wu

Hearing Date: January 13, 2020  
Time: 8:30 AM  
Place: Courtroom 9D

**REDACTED PUBLIC VERSION**

1 **I. INTRODUCTION**

2 It is in the Court's and the parties' best interests to stay this action pending the  
3 instituted *inter partes* review (IPR) proceedings. The PTAB has instituted IPR of all  
4 asserted claims of 7 of the 9 patents asserted here ('713, '173, '634, '250, '120, '351,  
5 '929 patents).<sup>1</sup> The patents under review account for [REDACTED]

6 [REDACTED] The PTAB has already determined that Facebook is likely to prevail in  
7 its challenges. *See* 35 U.S.C. § 314(a). The grounds are so compelling for the '173  
8 patent that BlackBerry filed a motion to amend the claims. Proceeding with claims  
9 that may be invalidated, or changed entirely, would be a waste of time and resources.

10 Staying this case also enables the Court to conduct a single trial on remaining  
11 issues. As the Court is aware, a Rule 54(b) judgment on the '351 and '929 was entered  
12 based on the Court's § 101 ruling, which BlackBerry has appealed. Facebook believes  
13 the ruling should be affirmed, but if BlackBerry prevails, a second trial would be  
14 necessary. This could be avoided by staying the present action pending IPRs, which  
15 are likely to have decisions in the same timeframe as the Federal Circuit's ruling on  
16 the appeal.<sup>2</sup> Even if the Federal Circuit were to reverse, the Court will have the benefit  
17 of the IPR decisions, enabling a single trial on whatever claims remain, if any.

18 **II. ARGUMENT**

19 **A. A Stay Pending IPR Would Simplify the Issues.**

20 A stay would simplify the issues, avoid parallel proceedings, and conserve  
21 scarce judicial resources. The PTAB instituted IPR on all asserted claims of the '713,  
22 '173, '634, '250, and '120. These account for [REDACTED]

23 [REDACTED]<sup>3</sup> If the claims are invalidated, all Instagram products would drop out, as well as  
24

25 <sup>1</sup> The Court entered final judgment as to the '351 and '929 patents. (Dkt. 491.)

26 <sup>2</sup> The PTAB generally issues final decisions within 12 months of institution. *See* 35  
27 U.S.C. § 316(a)(11). Thus, decisions are expected between Aug. and Nov. 2020.

28 <sup>3</sup> Based on the timely-served reports, the five instituted patents account for [REDACTED]

1 Facebook Pages Manager, Workplace Chat, and others. The case would be greatly  
2 simplified, with only 3 claims of 2 patents (the '236 and '961), which account for [REDACTED]  
3 [REDACTED]. See, e.g., *Pi-Net Int'l v. Focus Business Bank*, No.  
4 12-4958, 2013 WL 5513333, at \*1 (N.D. Cal. Oct. 3, 2013) (stay where IPR “would  
5 significantly limit Plaintiff’s damages”); *Parallax Group Int'l v. Greatmats.com*, No.  
6 16-927, 2017 WL 3485789, at \*2 (C.D. Cal. Mar. 23, 2017).

7 District courts have also recognized the wisdom of staying actions pending IPR  
8 challenges “in order to avoid inconsistent results.” *Netlist v. Smart Storage Sys.*, No.  
9 13-5889, 2015 WL 1738192, at \*1 (N.D. Cal. Apr. 9, 2015) (citation omitted). The  
10 possibility of inconsistent rulings here is not a theoretical issue – the two IPR  
11 proceedings that have (to date) progressed to advanced stages confirm that this is a  
12 real concern.

13 For example, in the '173 IPR, BlackBerry filed motions to amend its claims.<sup>4</sup>  
14 (Exs. 3-4.)<sup>5</sup> The proposed amendment would more than double the length of the  
15 independent claims with narrowing limitations not suggested by any of the original  
16 claims. (*Id.*) If the PTAB were to allow those amendments, they would wipe out the  
17 original claim and any trial on that claim would be a nullity. See 35 U.S.C. § 318(c)  
18 (citing 35 U.S.C. § 252); see also *BIC Leisure Prods. v. Windsurfing Int'l*, 1 F.3d  
19 1214, 1220-21 (Fed. Cir. 1993) (discussing intervening rights).

20 In both the '173 and '120 IPRs (the two IPRs that have so far progressed to  
21 advanced stages), BlackBerry is advancing narrow claim constructions inconsistent

22 \_\_\_\_\_  
23 [REDACTED] (Ex. 1). Without notice or leave of court, BlackBerry  
24 served a supplemental report purporting to [REDACTED]  
25 Facebook has moved to strike. (Dkt. 493.) Even if that untimely report is allowed,  
26 the IPR'd patents constitute [REDACTED]

26 <sup>4</sup> According to PTAB statistics, at least one claim was found unpatentable in 80% of  
27 trials—all claims in 63% of trials. (Ex. 2, at 10.) Only one or two asserted claims  
28 remain here for most of the instituted patents, so that disposition is likely.

<sup>5</sup> Unless otherwise noted, all exhibits are to the Declaration of Matthew J. Brigham.

1 with its broad litigation interpretations here. This inconsistency is troubling  
2 considering that the PTAB must apply the same claim construction standard as the  
3 Court. *See* 37 C.F.R. § 42.100(b) (as amended October 11, 2018). For example,  
4 BlackBerry and its expert argued here that the '173 term "tag source" should take its  
5 plain and ordinary meaning of "just a source of tags." (Ex. 5, 110:9-19). But in the  
6 IPR, BlackBerry provided ten pages of extensive written arguments advocating that  
7 this term requires "separately searchable collections of tags." (Ex. 6, at 20-30).

8 BlackBerry has taken a similar approach with the '120. The Court construed  
9 "notification" as "some form of visual, auditory, or physical cue to draw attention to  
10 an incoming message that would not otherwise have been noticed, at the time of the  
11 incoming message." (Dkt. 157, at 31.) In its December 11, 2019 IPR response,  
12 BlackBerry spent 10 pages arguing that the Court's construction imposed additional  
13 requirements, including that a notification be "something that must draw a user's  
14 attention away from something else, i.e., it must distract or otherwise interrupt a user  
15 from another activity." (Ex. 7, at 14 (emphasis added).) [REDACTED]

16 [REDACTED]  
17 [REDACTED]  
18 Accordingly, even if BlackBerry were to convince the PTAB that its claims are  
19 valid, such a ruling would almost certainly rest on claim construction rulings that are  
20 not part of the record here, but would have a direct impact on other issues such as non-  
21 infringement. Staying this action will give the Court the benefit of the full IPR record  
22 on claim construction, which would allow the Court and the parties to resolve and/or  
23 avoid any inconsistent rulings. Because the validity, scope, and even the very  
24 language of BlackBerry's claims remain in flux, the Court should stay this case. *E.g.*,  
25 *SurfCast v. Microsoft*, No. 12-333, 2014 WL 6388489, at \*3 (D. Me. Nov. 14, 2014);  
26 *TeleSign v. Twilio*, No. 15-3240, 2016 WL 6821111, at \*3-4 (C.D. Cal. Mar. 9, 2016).

27 **B. The Stage of the Case Favors a Stay.**

28 Some of the most costly and time-consuming portions of the case lie ahead.

1 Summary judgment and *Daubert* briefing is due in January and February, and trial  
2 begins in April. (Dkt. 480.) In many such cases, courts have granted stays. *See e.g.*,  
3 *SPEX Techs. v. Kingston Tech.*, No. 16-1790, 2018 WL 2446801, at \*2 (C.D. Cal.  
4 May 16, 2018) (stay where “the parties have undertaken discovery and the Court has  
5 held a Markman hearing, [but] much remains to be done, including dispositive  
6 motions, *Daubert* motions, and, of course, trial.”); *Huawei Techs. v. Samsung Elecs.*,  
7 No. 16-2787, 2018 WL 2971159, at \*3-4 (N.D. Cal. Jun. 13, 2018); *Contour IP*  
8 *Holding v. GoPro*, No. 17-4738, 2018 WL 6574188, at \*3 (N.D. Cal. Dec. 12, 2018);  
9 *FastVDO v. AT&T Mobility*, No. 16-385, 2017 WL 2323003, at \*3 (S.D. Cal. Jan. 23,  
10 2017); *Ricoh v. Aeroflex*, No. 3-4669, 2006 WL 3708069, at \*5-6 (N.D. Cal. Dec. 14,  
11 2006). Because a stay would relieve the Court of multiple dispositive and *Daubert*  
12 motions in a 7-patent case involving 3 Defendants, numerous products, and 14 experts,  
13 a stay is favored.

14 **C. Facebook Did Not “Dally” in Seeking IPR.**

15 The Court has said it may deny a stay “if a party has dallied in filing the IPR  
16 request” (Dkt. 166, at 2). That did not occur here. The nine original patents presented  
17 nearly 200 claims. BlackBerry did not serve its narrowed list of 48 claims until  
18 February 7, 2019, less than two months before the IPR filing deadline (April 6, 2019).  
19 (Dkt. 93, at 3:4-6.) Facebook’s IPR petitions focused on the asserted claims. Filing  
20 before BlackBerry’s narrowing would have required challenging scores of irrelevant  
21 claims, thus wasting PTAB resources. Further, this motion was only brought after all  
22 of the IPR institution decisions were issued. (Exs. 9-19.)

23 The timing of Facebook’s IPR filings was also guided by the claim construction  
24 process, including the exchange of proposed constructions and culminating in the  
25 Court’s order of April 5, 2019 (which issued one day before the IPR deadline). (Dkt.  
26 157.) By allowing the process to unfold, Facebook filed targeted IPR petitions that  
27 took into account claim construction rulings and stipulated constructions.

28 The IPR record confirms the importance of having a fully developed claim

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
