## I. INTRODUCTION

Petitioner Comcast Cable Communications, LLC (“Petitioner”) requests *inter partes* review of Claims 1-14 of U.S. Patent No. 8,934,535 (Ex. 1001). The ’535 Patent refers to methods for compressing data with an asymmetric data compressor. According to the ’535 Patent, these techniques aim to increase the storage/retrieval bandwidth of mass storage devices which traditionally suffer from “profound read/write data rate limitations” that “severely limit” data-dependent applications. Ex. 1001 at 2:53-61.

But the techniques of the ’535 Patent were known in the prior art well before the priority date of the ’535 Patent. Specifically, to obtain allowance of independent Claim 1, the Applicant added the feature of using “asymmetric data compression” to differentiate from anticipatory prior art. Ex. 1002 at 435, 411. Asymmetric compression algorithms and the ability to select between compression algorithms, however, were widely used in the compression field and extensively described in the prior art. Ex. 1003 at 74-78; *see, e.g.*, Ex. 1005; Ex. 1007.

## II. GROUNDS FOR STANDING

Petitioner certifies that the ’535 Patent is eligible for *inter partes* review. Petitioner further certifies that it is not barred or estopped from requesting this *inter partes* review on the grounds identified herein.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.
