# The '116 patent (IPR2019-00700)

1. A method of initiating a data exchange session among mobile devices, the method comprising:

receiving, at a server, a request from an initiating mobile device to allocate a session identifier to use in a data exchange session with a participating mobile device, wherein the session identifier comprises a network port number of the server;

transmitting, from the server, the session identifier to the initiating mobile device, wherein the initiating mobile device uses a page-mode messaging service to assist in communicating the session identifier to the participating mobile device and wherein the page-mode messaging service utilizes a unique identifier to locate the participating mobile device;

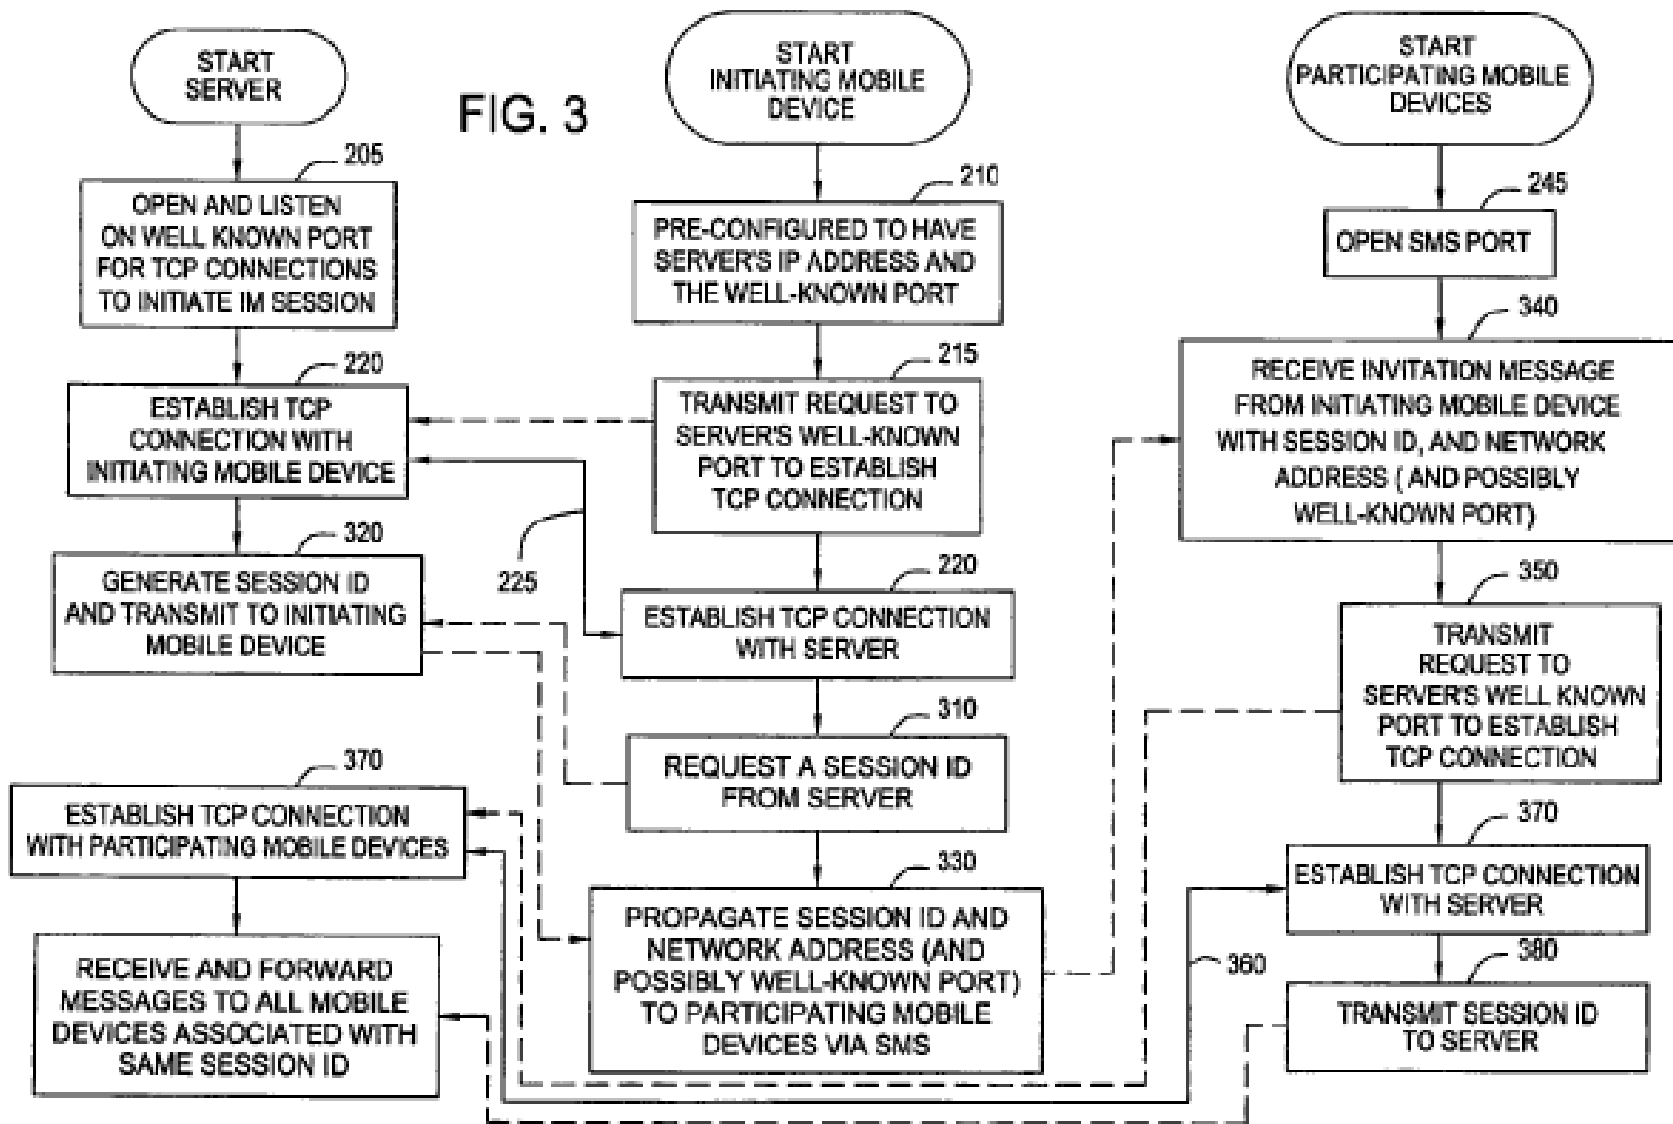

establishing, at the server, connections with the initiating mobile device and the participating mobile device based on the session identifier; and

facilitating, at the server, the data exchange session between the initiating mobile device and the participating mobile device.

# The '877 patent (IPR2019-00701)

1. A method of initiating a data exchange session among mobile devices, the method comprising:
  - transmitting a request to a server to allocate a network address and port associated with the server to use in a data exchange session with a participating mobile device;
  - receiving the network address and port from the server;
  - using a page-mode messaging service to assist in communicating the network address and port to the participating mobile device, wherein the page-mode messaging service utilizes a unique identifier to locate the participating mobile device; and
  - participating in the data exchange session with the participating mobile device through the server, wherein the participating mobile device has established a connection with the server using the network address and port.

# Petitioner Has Failed to Meet its Burden

## IPR2019-00700 and -701 present virtually identical grounds:

Ground	Claims	Reference(s)
1	1-20	Kirmse <sup>1</sup> , and Chambers <sup>2</sup>
2	1-20	Chambers and RSIP <sup>3</sup>
3	1-3, 5-10, 12-17, 19-20	Cordenier <sup>4</sup> and TURN <sup>5</sup>

- ✓ In Ground 1, Petitioner at least fails to establish obviousness based on its exclusive reliance on Kirmse for “[receiving, at a server /an input port to receive] a request from an initiating mobile device to allocate a session identifier to use in a data exchange session with a participating mobile device, wherein the session identifier comprises a network port number of the server.”
- ✓ In Ground 2, Petitioner at least fails to prove Chambers and RSIP discloses “[receiving, at a server,/an input port to receive] a request from an initiating mobile device to allocate a session identifier to use in a data exchange session with a participating mobile device, wherein the session identifier comprises a network port number of the server.”
- ✓ In Ground 3, Petitioner at least fails to prove it would have been obvious to combine Cordenier and TURN in the manner proposed.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
