The '925 Patent

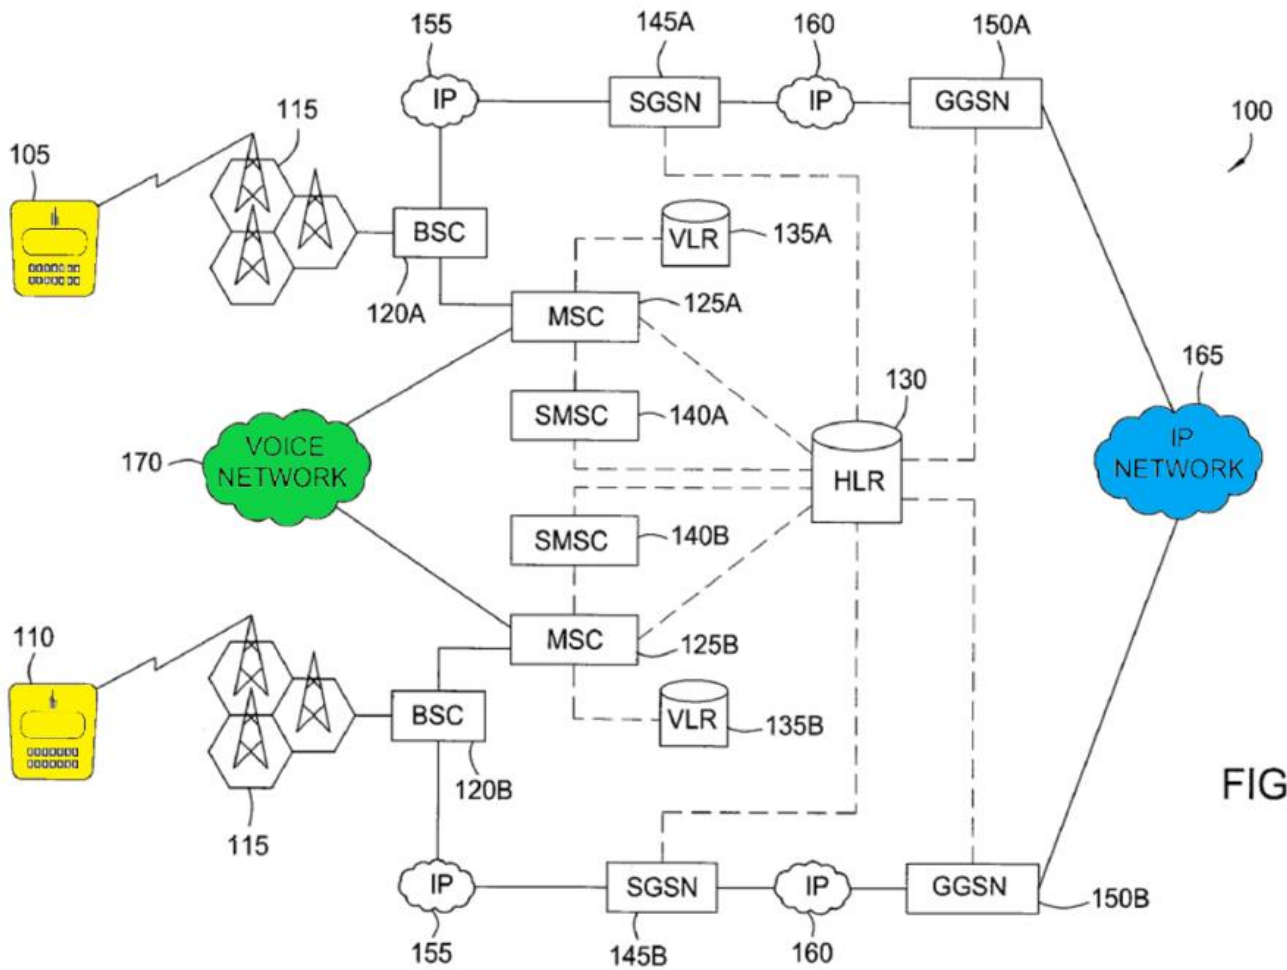

FIG. 1

The '925 Patent

- The '925 patent is directed toward a “Peer-to-Peer Mobile Data Transfer Method and Device”
 - Data transfers are made without the need for a server to store

SUMMARY OF THE INVENTION

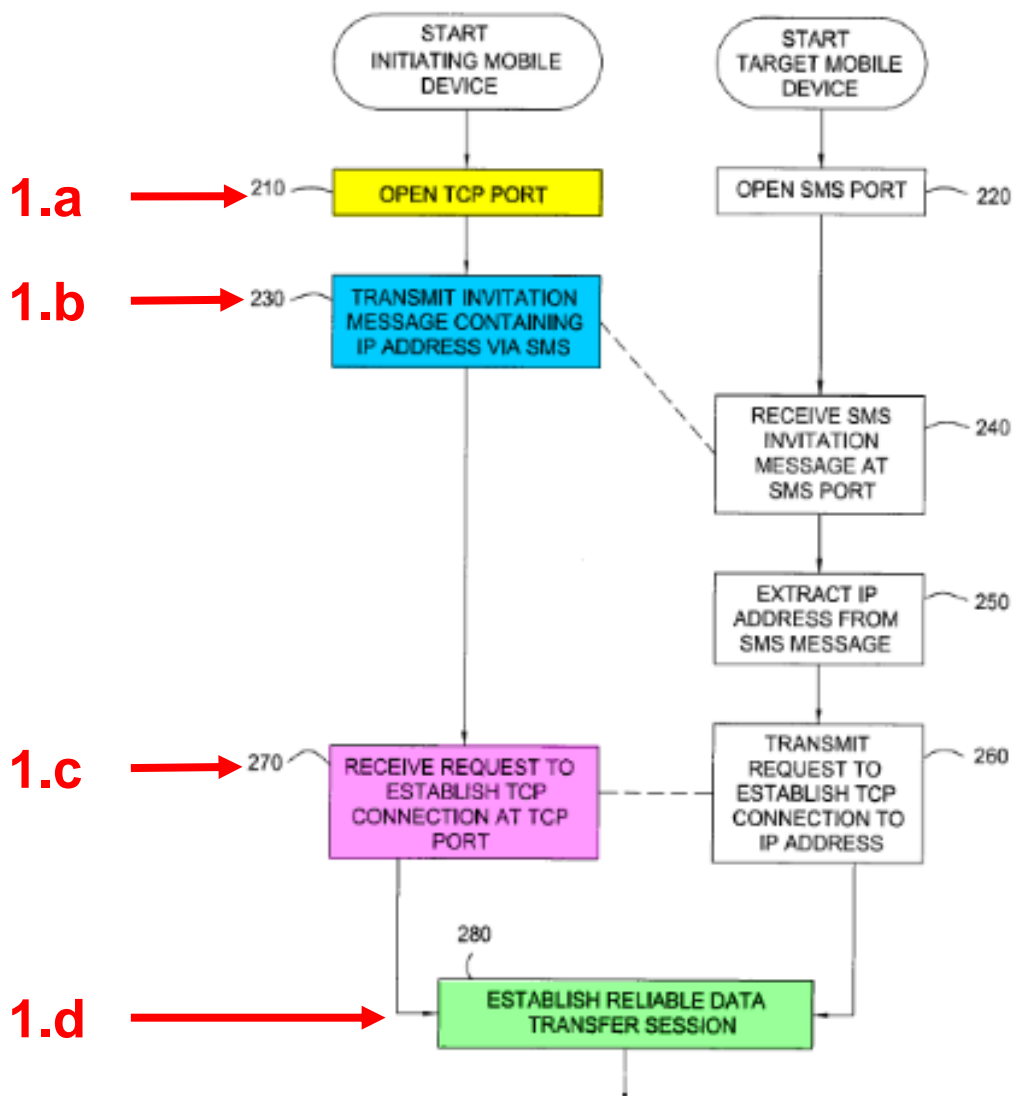

The present invention provides a method for establishing a direct data transfer session between mobile devices over a digital mobile network system that supports data packet-based communications. Under the present invention, no separate data server need be used to provide a known location from which a recipient retrieves data such as multimedia content. Instead, a mobile device initiating a data transfer

- The initiating mobile device does not know the target's IP address

In order to provide direct data transfer capabilities between mobile devices, an initiating mobile device must have knowledge of the IP address (and possibly, a port) of the target device in order to establish a direct data transfer. Current mobile multimedia messaging solutions, such as MMS do not provide direct data transfer capabilities because the initiating
