Education

Doctor of Philosophy (Ph.D.), Computer Science, January 1998
Oregon State University, Corvallis, Oregon, USA

- Dissertation: *Pattern Systems and Methodologies for Multiparadigm Analysis and Design*
- Advisors: Curtis R. Cook, Timothy A. Budd

Master of Science (M.S.), Computer Science, August 1994
Brigham Young University, Provo, Utah, USA

- Thesis: *TalkLib: An Object-Oriented Mechanism for Distributed Communication*
- Advisors: Scott N. Woodfield, Evan L. Ivie

Bachelor of Science (B.S.), Computer Science, April 1988
Brigham Young University, Provo, Utah, USA

University of Iowa, September 1982 – December 1984

Professional Experience

Associate Professor (August 2018 – Present)

Utah Valley University, Computer Science Department, Orem, Utah

Taught undergraduate courses, including Computer Organization and Architecture; Analysis of Programming Languages; Software Design.

Member, Board of Directors (February 2018 – Present)

EP3 Foundation, San Jose, California

[EP3 Foundation](#) is a non-profit corporation whose mission is to empower privacy and personalization, helping individuals and organizations to use the Internet in new ways to solve difficult identity, consent, and confidentiality requirements. I was a founding board member of EP3 Foundation.

Founder, Managing Partner (January 2013 – Present)

Ironwood Experts, LLC, Alpine, Utah

[Ironwood Experts](#) is a consulting firm providing support for software IP litigation (especially patent and trade secret cases) as well as software process consulting and training. We have provided expert services to some of the world's leading technology companies including Apple, Google, Microsoft, Amazon, Comcast, Toyota, Cisco, Barnes and Noble, Expedia, Vizio and others. We provide expert witness services as well as technical support including prior art search, claim charts, source code analysis and technical document review. We have served on cases in district courts, the International Trade Commission, the Federal Trade Commission and USPTO reexaminations. Ironwood Experts also provides software engineering consulting and training particularly focused on software process and software product quality. Ironwood also provides custom software testing services.

Founder, Chairman, CEO (November 2012 – Present)

Kinpoint, Inc., Alpine, Utah

[Kinpoint, Inc.](#) began in 2007 as a student project in the BYU Computer Science Department (originally dubbed "The 20-Minute Genealogist"). After a five-year incubation on campus, Kinpoint, Inc. launched as a corporation in late 2012. Kinpoint's mission is to enable the 90% of people who have an interest in family history research and yet spend little to no time actually doing it. In February 2017 Kinpoint released the Take a Name® app which reached 400,000 installs in its first 18 months.

Founder, Chairman, Podcast Host (October 2007 – January 2018)

The Internet Safety Project, Provo, Utah

The Internet Safety Project was a non-profit corporation dedicated to helping individuals navigate the intersections between technology and life. The Internet Safety Podcast was a popular audio program dealing with issues of Internet Safety across a broad range of topics. The Internet Safety Wiki was a collaborative information resource hosting thousands of articles focused on the full range of Internet Safety issues, providing a "one stop shop" for individuals concerned about issues of safety online.

Associate Professor (September 2006 – December 2014)

Brigham Young University, Computer Science Department, Provo, Utah

Founder and Director, BYU SEQuOIA ("Software Engineering Quality: Observation, Insight, Analysis") Laboratory. Research interests in Software Engineering, Software Process, Open-Source Software, Social Media, Social Network Analysis, Software Archaeology, Software Quality, Software Management, Software Patterns, Multiparadigm Programming and Design. Taught undergraduate courses including Introduction to Computing; Software Engineering; Ethics and Computers in Society. Taught graduate courses including Empirical Software Engineering; Research in Social Media; Social Network Analysis; Research in Open Source Systems; Empirical Research in Software Engineering Productivity.

Assistant Professor (July 2000 – August 2006)

Brigham Young University, Computer Science Department, Provo, Utah

Founder and Director, BYU Mobile Computing Laboratory. Research interests in Wireless Data Communications, Bluetooth, Infrared Data Communications, Embedded Systems, Networking, Multiprotocol Communication Systems. Taught undergraduate courses including Programming with C++; Software Engineering; Ethics and Computers in Society. Taught graduate courses including Performance Analysis; Wireless Data Communications.

Senior Instructor (September 1999 – June 2000)

Oregon State University, Computer Science Department, Corvallis, Oregon

Member of Software Engineering faculty. Responsibilities for developing and teaching graduate courses in Oregon Master of Software Engineering (OMSE) Program. Taught graduate courses including Introduction to Software Engineering; Software Quality.

Vice President, Research and Development (October 1996 – August 1999)

Counterpoint Systems Foundry, Inc., Corvallis, Oregon

Guided and managed development of system and application software for infrared and Bluetooth data communications including the Infrared beaming capability for all PalmOS devices (including the original Palm Pilot). Counterpoint was an early member and technical leader of the Infrared Data Association (IrDA), international industry consortium for infrared data communication, and secured 80% of all design wins in the world during my tenure. Counterpoint became a wholly-owned subsidiary of Extended Systems, Inc. in April 1997 and was part of Extended System's IPO in 1999. Counterpoint currently operates as OpenSynergy, Inc.

Software Quality Consultant (September 1994 – October 1996)

ComSoft Consulting, Corvallis, Oregon

Provided software consulting services including project management, analysis, design, development, testing, and documentation. Development in C, C++ and Assembly. Clients included Novell, Inc. and Intel Corporation.

Development Engineer/Technical Lead (August 1991 – September 1994)

Novell, Inc., NetWare Products Division, Provo, Utah

Developed Storage Management Services (SMS) Target Service Agent (TSA) for OS/2. Developed automated tools for advanced distributed testing. Development in C on DOS, OS/2 and NetWare.

System Test Manager, Client Software (April 1990 – August 1991)

Novell, Inc., NetWare Products Division, Provo, Utah

Managed seven System Test teams, including OS/2 Requester, Windows NetWare Drivers, DOS NetWare Shells, Communication Protocols, NetWare Lite, IBM Interoperability and OS/2 File Server. Managed 16 engineers.

Columnist (February 1990 – August 1990)

LAN Times, McGraw-Hill, Midvale, Utah

Monthly column on NetWare OS/2 Requester.

Contributing Editor (February 1990 – August 1990)

NetWare Technical Journal, McGraw-Hill, Midvale, Utah

Contributed articles, editing, and consultation.

Development Engineer (April 1988 – March 1989)

Hewlett-Packard, Personal Computer Group, Sunnyvale, California

OS/2 development team for the HP Vectra line of personal computers, assisting in adapting Microsoft OS/2 to Vectra platforms. Development in MASM and C.

Instructor (September 1988 – March 1989)

Disabled Programmers, Inc., San Jose, California

Developed and taught courses on UNIX Operating System; UNIX Shell Programming; C Programming Language; Relational Databases (emphasis on DB2); Software Engineering.

Instructor (July 1988 – March 1989)

National University, San Jose, California

Developed and taught courses on Operating Systems (emphasis on Unix); Comparative Programming Languages (emphasis on C, LISP, Forth).

Instructor (September 1987 – April 1988)

Waterford Upper School, Provo, Utah

Taught beginning and intermediate Programming with Pascal.

Programmer/Technical Writer (April 1987 – January 1988)

Signetics Corporation, Provo, Utah

Maintained and documented interactive TTL circuit design package on Lillith personal computer. Programming in Modula II.

Instructor (July 1987 – August 1987)

Brigham Young University, Computer Science Department, Provo, Utah

Taught Introduction to Computer Architecture and Assembly Language Programming (emphasis on Motorola 6502 architecture).

Director, Technical Development (April 1986 – February 1987)

Innovative Courseware Design Corporation, Provo, Utah

Designed and supervised development of interactive educational software for IBM PC compatibles (VersaText and VersaText Authoring System).

Publications

Academic Conference Publications

1. Sabrina Bailey, Sneha Godbole, Charles D. Knutson and Jonathan L. Krein. "A Decade of Conway's Law: A Literature Review." *Proceedings of the 3rd International Workshop on Replication in Empirical Software Engineering Research (RESER 2013)*, Baltimore, Maryland, October 9, 2013.
2. Kyle Blatter, T.J. Gledhill, Jonathan L. Krein and Charles D. Knutson. "Impact of Communication Structure on System Design: Towards a Controlled Test of Conway's Law." *Proceedings of the 3rd International Workshop on Replication in Empirical Software Engineering Research (RESER 2013)*, Baltimore, Maryland, October 9, 2013.
3. Alexander C. MacLean and Charles D. Knutson. "Apache Commits: Social Network Dataset." *Proceedings of the 10th Working Conference on Mining Software Repositories (MSR 2013)*, San Francisco, California, May 18-19, 2013.
4. Brandon Foushee, Jonathan L. Krein, Justin Wu, Randy Buck, Charles D. Knutson, Landon J. Pratt and Alexander C. MacLean. "Reflexivity, Raymond, and the Success of Open Source Software Development: A SourceForge Empirical Study." *Proceedings of the 17th International Conference on Evaluation and Assessment in Software Engineering (EASE 2013)*, Porto de Galinhas, Brazil, April 14-16, 2013.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
