It is not believed that extensions of time are required beyond those that may otherwise be provided for in documents accompanying this paper. However, if additional extensions of time are necessary to prevent abandonment of this application, then such extensions of time are hereby petitioned under 37 C.F.R. § 1.136(a), and any additional fees required to continue prosecution or appeal of this application (including issue fee, fees for net addition of claims or forwarding to appeal) are hereby authorized to be charged to our Deposit Account No. 19-0036.

Amendments to the Specification

1. Applicant respectfully requests ¶ [0054] of the Specification as filed on December 19, 2013 be amended as follows:

[0054] The present invention is directed to a system and method for compressing and decompressing based on the actual or expected throughput (bandwidth) of a system employing data compression. Although one of ordinary skill in the art could readily envision various implementations for the present invention, a preferred system in which this invention is employed comprises a data storage controller that preferably utilizes a real-time data compression system to provide “accelerated” data storage and retrieval bandwidths. The concept of “accelerated” data storage and retrieval was introduced in ~~eo-pending~~ U.S. Patent Application Serial No. 09/266,394, filed March 11, 1999, entitled “System and Methods For Accelerated Data Storage and Retrieval,” now U.S. Patent No. 6,601,104, and ~~eo-pending~~ U.S. Patent Application Serial No. 09/481,243, filed January 11, 2000, entitled “System and Methods For Accelerated Data Storage and Retrieval,” now U.S. Patent No. 6,604,158, both of which are commonly assigned and incorporated herein by reference.

2. Applicant respectfully requests ¶ [0079] of the Specification as filed on December 19, 2013 be amended as follows:

[0079] Further, the present invention can be implemented with a data storage controller utilizing data compression and decompression to provided accelerated data storage and retrieval from a mass storage device. Exemplary embodiments of preferred data storage controllers in which the present invention may be implemented are described, for example, in U.S. Patent Application Serial No. 09/775,905, filed on February 2, 2001, entitled “Data Storewidth Accelerator”, now U.S.

Patent No. 6,748,457, which is commonly assigned and fully incorporated herein by reference.

3. Applicant respectfully requests ¶ [0083] of the Specification as filed on December 19, 2013 be amended as follows:

[0083] The storage controller 120 further comprises computer reset and power up circuitry 128 (or “boot configuration circuit”) for controlling initialization (either cold or warm boots) of the host computer system and storage controller 120. A preferred boot configuration circuit and preferred computer initialization systems and protocols are described in U.S. Patent Application Serial No. 09/775,897, filed on February 2, 2001, entitled “System and Methods For Computer Initialization,” now abandoned, which is commonly assigned and incorporated herein by reference. Preferably, the boot configuration circuit 128 is employed for controlling the initializing and programming the programmable logic device 122 during configuration of the host computer system (i.e., while the CPU of the host is held in reset). The boot configuration circuit 128 ensures that the programmable logic device 122 (and possibly other volatile or partially volatile logic devices) is initialized and programmed before the bus 116 (such as a PCI bus) is fully reset. In particular, when power is first applied to the boot configuration circuit 128, the boot configuration circuit 28 generates a control signal to reset the local system (e.g., storage controller 120) devices such as a DSP, memory, and I/O interfaces. Once the local system is powered-up and reset, the controlling device (such as the DSP 121) will then proceed to automatically determine the system environment and configure the local system to work within that environment. By way of example, the DSP 121 of the disk storage controller 120 would sense that the data storage controller 120 is on a PCI computer bus (expansion bus) and has attached to it a hard disk on an IDE interface. The DSP 121 would then load the appropriate PCI and IDE interfaces into the programmable logic device 122 prior to

Atty. Dkt. No. 2855.0050008

completion of the host system reset. Once the programmable logic device 122 is configured for its environment, the boot device controller is reset and ready to accept commands over the computer/expansion bus 116.

Based on the above amendment and the following remarks, Applicant respectfully requests that the Examiner reconsider all outstanding objections and rejections and that they be withdrawn. Throughout the Remarks, Applicant reminds the Examiner that the claims are given their broadest reasonable meaning in view of the specification, and any paraphrasing of the claim features is not to be interpreted as reading any features into, or characterizing of, the claims.

Prioritized Examination

The request for prioritized examination for this Application was granted on January 27, 2014. Applicant has canceled, without prejudice to or disclaimer of the subject matter therein, claims 4, 5, 12, 13, 19, 20, 26, and 27 and added claims 31-38 in this Amendment and Reply. Accordingly, this Application continues to contain four independent claims and thirty total claims. And Applicant is timely filing this

Amendment and Reply without a petition for extension of time. Accordingly, this Application remains eligible for prioritized examination.

Rejections under 35 U.S.C. § 112

Claims 1-16, 20, 21, 27, and 28 stand rejected under 35 U.S.C. § 112, first paragraph, for allegedly failing to comply with the written description requirement. Without acquiescing to the merits of this allegation, Applicant has cancelled dependent claims 4, 5, 12, 13, 20, and 27 without prejudice or disclaimer, thereby rendering moot the objections of the same. Applicant contends that the canceling of this claim does not give rise to any implication regarding whether Applicant agrees with or acquiesces to this objection. In regard to independent claims 1 and 8 and dependent claims 21 and 28, Applicant respectfully traverses the objection and provides the following arguments to support patentability.

Without acquiescing to the merits of this allegation and for the purpose of advancing prosecution of this Application, Applicant has amended independent claim 1 to recite at least the features of “*selecting one or more compression algorithms... based upon the determined parameter or attribute and a throughput of a communication channel*” to accommodate the Examiner’s rejection. Applicant has amended claims 8, 21, and 28, without acquiescing to the merits of this allegation and for the purpose of advancing prosecution of this Application, in a substantially similar manner as independent claim 1 using analogous language to similarly accommodate the Examiner’s rejection.

In regard to at least the features of “*selecting one or more compression algorithms... based upon the determined parameter or attribute and a throughput of a*

communication channel” as recited by independent claim 1 and as analogously recited by claims 8, 21, and 28, Applicant believes the words, structures, figures, diagrams, and formulas as filed in the Specification on December 19, 2013 fully set forth these aforementioned features as recited by claims 1, 8, 21, and 28. As a non-limiting example, Applicant respectfully directs the Examiner to ¶ [0002] of the Specification that provides, with emphasis added:

[0002] The present invention relates generally to data compression and decompression and, in particular, to a system and method for compressing and decompressing data based on an actual or expected throughput (bandwidth) of a system that employs data compression. Additionally the present invention relates to the subsequent storage, retrieval, and management of information in data storage devices utilizing either compression and/or accelerated data storage and retrieval bandwidth.

As another non-limiting example, Applicant respectfully directs the Examiner to ¶ [0056] of the Specification that provides, with emphasis added:

[0056] In a preferred embodiment, the present invention is implemented for providing accelerated data storage and retrieval. In one embodiment, a controller tracks and monitors the throughput (data storage and retrieval) of a data compression system and generates control signals to enable/disable different compression algorithms when, e.g., a bottleneck occurs so as to increase the throughput and eliminate the bottleneck.

As a further non-limiting example, Applicant respectfully directs the Examiner to ¶ [0060] of the Specification that provides, with emphasis added:

[0060] Referring now to Fig. 1, a high-level block diagram illustrates a system for providing bandwidth sensitive data compression/decompression according to an embodiment of the present invention. In particular, Fig. 1 depicts a host system 10 comprising a controller 11 (e.g., a file management system), a compression/decompression (or data compression) system 12, a plurality of compression algorithms 13, a storage medium 14, and a plurality of data profiles 15. The controller tracks and monitors the throughput (e.g., data storage and retrieval) of the data compression system 12 and generates control signals to

enable/disable different compression algorithms 13 when the throughput falls below a predetermined threshold. In one embodiment, the system throughput that is tracked by the controller 11 preferably comprises a number of pending access requests to the memory system.

As a yet further non-limiting example, Applicant respectfully directs the Examiner to ¶ [0064] of the Specification that provides, with emphasis added:

[0064] In a preferred embodiment, the overall throughput (bandwidth) of the host system 10 is one factor considered by the controller 11 in deciding whether to use an asymmetrical or symmetrical compression algorithm for processing data stored to, and retrieved from, the storage medium 14. Another factor that is used to determine the compression algorithm is the type of data to be processed. In a preferred embodiment, the data profiles 15 comprise information regarding predetermined access profiles of different data sets, which enables the controller 11 to select a suitable compression algorithm based on the data type. For instance, the data profiles may comprise a map that associates different data types (based on, e.g., a file extension) with preferred one(s) of the compression algorithms 13...

One skilled in the art can reasonably conclude that the claimed “*throughput of the communication channel*” is to be considered when “*selecting the one or more compression algorithms*” from at least these aforementioned passages in the Specification. These aforementioned features of claims 1, 8, 21, and 28 are not to be construed solely based upon this aforementioned passage in the Specification. Applicant reserves the right to demonstrate that these aforementioned features of claims 1, 8, 21, and 28 can be construed based upon different passages in the Specification in the future.

Accordingly, Applicant believes at least the features of “*selecting one or more compression algorithms... based upon the determined parameter or attribute and a throughput of a communication channel*” as recited by independent claim 1 and as analogously recited by claims 8, 21, and 28 are sufficiently supported by at least ¶¶ [0002], [0056], [0060], and [0064] of, as well as elsewhere in, the Specification to

comply with the written description requirement. Dependent claims 2, 3, 7, 9-11, and 14-16 are likewise sufficiently supported by the Specification to comply with the written description requirement for at least the same reasons as the independent claims from which they depend and further in view of their own respective features. Accordingly, Applicant respectfully requests that the rejection of claims 1-3, 7-11, 14-16, 21, and 28 under 35 U.S.C. § 112, first paragraph, be reconsidered and withdrawn.

Rejections under 35 U.S.C. § 102

Claims 1-3, 6-10, 14-18, 21-25, and 28-30

Claims 1-3, 6-10, 14-18, 21-25, and 28-30 stand rejected under 35 U.S.C. § 102(e) as allegedly being anticipated by United States Patent No. 6,216,157 to Vishwanath et al. (“Vishwanath”). Applicant respectfully traverses the rejection and provides the following arguments to support patentability.

The Office Action indicates that “[c]laims 4, 12, 19, and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.” (Office Action, p. 13). Without acquiescing to the merits of this allegation and for the purpose of advancing prosecution of this Application, Applicant has amended independent claims 1, 8, 17, and 24 to substantially incorporate the “*asymmetric*” feature that was previously recited by dependent claims 4, 12, 19, and 26, respectively, each of which is now cancelled. The amendments to independent claims 1, 8, 17, and 24 presented herewith does not give rise to any implication regarding whether Applicant agrees with or acquiesces to this rejection.

Accordingly, Applicant believes that independent claims 1, 8, 17, and 24 should be in condition for allowance. Applicant believes dependent claims 2, 3, 6, 7, 9, 10, 14-16, 18, 21-23, 25, and 28-30 should likewise be in condition for allowance for at least the same reasons as the independent claims from which they depend and further in view of their own respective features. Accordingly, Applicant respectfully requests that the rejection of claims 1-3, 6-10, 14-18, 21-25, and 28-30 under 35 U.S.C. § 102(e) be reconsidered and withdrawn.

Allowable Subject Matter

Claims 4, 12, 19, and 26

Claims 4, 12, 19, and 26 stand objected to as allegedly “being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.” (Office Action, p. 13). Without acquiescing to the merits of this allegation, Applicant has cancelled dependent claims 4, 12, 19, and 26 without prejudice or disclaimer, thereby rendering moot the objections of the same. Applicant contends that the canceling of these claims does not give rise to any implication regarding whether Applicant agrees with or acquiesces to this objection.

Addition of New Claims

Claims 31-38

New claims 31-38 have been added. From the discussion above, Applicant has traversed the rejections to independent claims 1, 8, 17, and 24. Applicant believes dependent claims 31-38 should likewise be allowable for at least the same reasons as the

independent claims from which they respectively depend and further in view of their own respective features.

Conclusion

All of the stated grounds of objection and rejection have been properly traversed, accommodated, or rendered moot. Applicant therefore respectfully requests that the Examiner reconsider all presently outstanding objections and rejections and that they be withdrawn. Applicant believes that a full and complete reply has been made to the outstanding Office Action and, as such, the present application is in condition for allowance. If the Examiner believes, for any reason, that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at the number provided.

Prompt and favorable consideration of this Amendment and Reply is respectfully requested.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

DETAILED ACTION

1. The present application is being examined under the pre-AIA first to invent provisions.
2. This office action (Notice of Allowance) is in response to the amendment and remarks filed on 5/27/2014. The statuses of the claims are: claims 4-5, 12-13, 19-20 and 26-27 have been cancelled; and the pending claims 1-3, 6-11, 14-18, 21-25 and 28-38 are now allowed.

Information Disclosure Statement

3. The information disclosure statements (IDSs) submitted on 5/27/2014 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michaelo Malek (Reg. 65,211) on 6/30/2014.

The application has been amended as follows:

In the claim:

In claim 28, line 3, after "to" ---the---has been deleted.

In claim 30, line 1, "claim 23" has been amended to read as---claim 24---.

Remarks:

5. The above Examiner's Amendment to the claims was made for the following reasons:

- a. The amendment to claim 28 was to delete the second word "the" recited in the claim.
- b. The amendment to claim 30 was made to change the dependency of claim 30 to depend on an apparatus claim 24, where "an apparatus" has been claimed in the independent claim 24 instead of further limiting a method claim 23. Since claim 30 is further limiting an apparatus claim and claim 23 in which claim 30 is depending is a method claim, the amendment is necessary in order for claim 30 to further limit an apparatus claim of claim 24 instead of the method claim 23.

Reasons for Allowance

6. The following is an examiner's statement of reasons for allowance: the claimed subject matter in claims is allowable because the arts of record fail to teach or fairly suggest the claimed:

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

c. US patent numbers 7,548,657 issued to Deaven and US patent publication numbers 2007/0096954 and 2010/0011012 published to Boldt et al. and Rawson respectively disclose selection of compression/decompression algorithm according to the data parameter or attributes.

- Unselected checkboxes: Power of Attorney did not comply with new rules; revocation not signed; person signing omitted empowerment; inventor without authority; signature of co-inventor omitted; person not registered.
Selected checkbox: The Power of Attorney is from an assignee and the Certificate required by 37 CFR 3.73(c) has not been received.

- Only one Customer Number can be designated for the Power of Attorney in an application. The Customer Number that was captured is the first Customer Number provided on the Power of Attorney document.
- A request under 37 CFR 1.48 to add an inventor was granted in this application, however, no power of attorney consistent with the power of attorney granted by the originally named inventive entity has been received. Thus, the addition of the inventor has resulted in the loss of power of attorney in the application. See 37 CFR 1.32(e).
- The power of attorney has not been accepted because the party who is giving power of attorney has not been identified. Power of attorney may only be signed by the applicant for patent (37 CFR 1.42) or the patent owner. A patent owner who was not the applicant must appoint any power of attorney in compliance with 37 CFR 3.71 and 3.73. See 37 CFR 1.32(b)(4).
- The power of attorney from the inventors has not been accepted because it is a copy from a prior national application for which benefit is claimed and the continuing application names an inventor who was not named as an inventor in the prior application.
- The power of attorney from the inventors has not been accepted because the power of attorney must be signed by the applicant for patent. See 37 CFR 1.32(b)(4).
- Any request to correct or update the name of the applicant must include an application data sheet (ADS) in compliance with 37 CFR 1.76 specifying the correct or updated name of the applicant in the applicant information section. Any request to change the applicant after an original applicant has been specified under 37 CFR 1.46(b) must include a new ADS in compliance with 37 CFR 1.76 specifying the applicant in the applicant information section and comply with 37 CFR 3.71 and 3.73. See 37 CFR 1.46(c).

Authorization or Opt-Out of Authorization to Permit Access:

When this Application Data Sheet is properly signed and filed with the application, applicant has provided written authority to permit a participating foreign intellectual property (IP) office access to the instant application-as-filed (see paragraph A in subsection 1 below) and the European Patent Office (EPO) access to any search results from the instant application (see paragraph B in subsection 1 below).

Should applicant choose not to provide an authorization identified in subsection 1 below, applicant **must opt-out** of the authorization by checking the corresponding box A or B or both in subsection 2 below.

NOTE: This section of the Application Data Sheet is **ONLY** reviewed and processed with the **INITIAL** filing of an application. After the initial filing of an application, an Application Data Sheet cannot be used to provide or rescind authorization for access by a foreign IP office(s). Instead, Form PTO/SB/39 or PTO/SB/69 must be used as appropriate.

1. Authorization to Permit Access by a Foreign Intellectual Property Office(s)

A. Priority Document Exchange (PDX) - Unless box A in subsection 2 (opt-out of authorization) is checked, the undersigned hereby **grants the USPTO authority** to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the State Intellectual Property Office of the People's Republic of China (SIPO), the World Intellectual Property Organization (WIPO), and any other foreign intellectual property office participating with the USPTO in a bilateral or multilateral priority document exchange agreement in which a foreign application claiming priority to the instant patent application is filed, access to: (1) the instant patent application-as-filed and its related bibliographic data, (2) any foreign or domestic application to which priority or benefit is claimed by the instant application and its related bibliographic data, and (3) the date of filing of this Authorization. See 37 CFR 1.14(h)(1).

B. Search Results from U.S. Application to EPO - Unless box B in subsection 2 (opt-out of authorization) is checked, the undersigned hereby **grants the USPTO authority** to provide the EPO access to the bibliographic data and search results from the instant patent application when a European patent application claiming priority to the instant patent application is filed. See 37 CFR 1.14(h)(2).

The applicant is reminded that the EPO's Rule 141(1) EPC (European Patent Convention) requires applicants to submit a copy of search results from the instant application without delay in a European patent application that claims priority to the instant application.

2. Opt-Out of Authorizations to Permit Access by a Foreign Intellectual Property Office(s)

A. Applicant **DOES NOT** authorize the USPTO to permit a participating foreign IP office access to the instant application-as-filed. If this box is checked, the USPTO will not be providing a participating foreign IP office with any documents and information identified in subsection 1A above.

B. Applicant **DOES NOT** authorize the USPTO to transmit to the EPO any search results from the instant patent application. If this box is checked, the USPTO will not be providing the EPO with search results from the instant application.

NOTE: Once the application has published or is otherwise publicly available, the USPTO may provide access to the application in accordance with 37 CFR 1.14.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.
