

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

APPLE INC.,
Petitioner,

v.

MPH TECHNOLOGIES OY,
Patent Owner.

Case No. IPR2019-00820
Patent No. 7,937,581

DECLARATION OF RICHARD B. MEGLEY, JR.

I, Richard B. Megley, Jr., declare the following:

1. I am an attorney at the law firm of Lee Sheikh Megley & Haan LLC.
2. I provide this Declaration in connection with Case No. IPR2019-00820.

Unless otherwise stated, the facts contained in this Declaration are based on my personal knowledge.

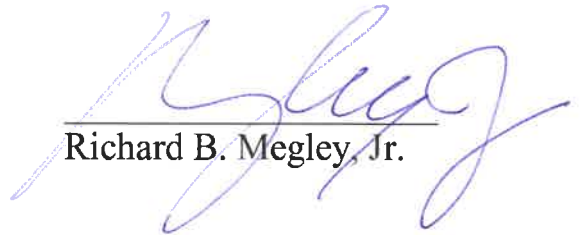

3. On information and belief, Exhibit 2001 in the above-identified *Inter Partes* Review proceeding is a true and accurate copy of Request for Comments (RFC) 2002, titled, “IP Mobility Support.”

4. On information and belief, RFC 2002 was archived on May 30, 1998 at the following link: <http://www.nic.it/mirrors/rfc/rfc2002.txt>.

5. I accessed the May 30, 1998 archived version of RFC 2002 via the Internet Archive: Wayback Machine (located at <http://web.archive.org/web/19980530061445/http://www.nic.it/mirrors/rfc/rfc2002.txt>), and printed out the attached copy.

6. I declare that all statements made herein of my knowledge are true and that all statements made on information and belief are believed to be true, and that these statements were made with knowledge that willful false statements and the like are made punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

Date: May 28, 2019

IP Mobility Support

Status of this Memo

This document specifies an Internet standards track protocol for the Internet community, and requests discussion and suggestions for improvements. Please refer to the current edition of the "Internet Official Protocol Standards" (STD 1) for the standardization state and status of this protocol. Distribution of this memo is unlimited.

Abstract

This document specifies protocol enhancements that allow transparent routing of IP datagrams to mobile nodes in the Internet. Each mobile node is always identified by its home address, regardless of its current point of attachment to the Internet. While situated away from its home, a mobile node is also associated with a care-of address, which provides information about its current point of attachment to the Internet. The protocol provides for registering the care-of address with a home agent. The home agent sends datagrams destined for the mobile node through a tunnel to the care-of address. After arriving at the end of the tunnel, each datagram is then delivered to the mobile node.

Table of Contents

- 1. Introduction 3
 - 1.1. Protocol Requirements 3
 - 1.2. Goals 4
 - 1.3. Assumptions 4
 - 1.4. Applicability 4
 - 1.5. New Architectural Entities 5
 - 1.6. Terminology 6
 - 1.7. Protocol Overview 8
 - 1.8. Specification Language 11
 - 1.9. Message Format and Protocol Extensibility 12
- 2. Agent Discovery 14
 - 2.1. Agent Advertisement 14
 - 2.1.1. Mobility Agent Advertisement Extension 16
 - 2.1.2. Prefix-Lengths Extension 18
 - 2.1.3. One-byte Padding Extension 19
 - 2.2. Agent Solicitation 19
 - 2.3. Foreign Agent and Home Agent Considerations 19
 - 2.3.1. Advertised Router Addresses 20

2.3.2. Sequence Numbers and Rollover Handling	21
2.4. Mobile Node Considerations	21
2.4.1. Registration Required	22
2.4.2. Move Detection	22
2.4.3. Returning Home	24
2.4.4. Sequence Numbers and Rollover Handling	24
3. Registration	24
3.1. Registration Overview	25
3.2. Authentication	26
3.3. Registration Request	26
3.4. Registration Reply	29
3.5. Registration Extensions	32
3.5.1. Computing Authentication Extension Values	32
3.5.2. Mobile-Home Authentication Extension	33
3.5.3. Mobile-Foreign Authentication Extension	33
3.5.4. Foreign-Home Authentication Extension	34
3.6. Mobile Node Considerations	34
3.6.1. Sending Registration Requests	36
3.6.2. Receiving Registration Replies	40
3.6.3. Registration Retransmission	42
3.7. Foreign Agent Considerations	43
3.7.1. Configuration and Registration Tables	44
3.7.2. Receiving Registration Requests	44
3.7.3. Receiving Registration Replies	47
3.8. Home Agent Considerations	49
3.8.1. Configuration and Registration Tables	49
3.8.2. Receiving Registration Requests	49
3.8.3. Sending Registration Replies	53
4. Routing Considerations	55
4.1. Encapsulation Types	56
4.2. Unicast Datagram Routing	56
4.2.1. Mobile Node Considerations	56
4.2.2. Foreign Agent Considerations	57
4.2.3. Home Agent Considerations	58
4.3. Broadcast Datagrams	59
4.4. Multicast Datagram Routing	60
4.5. Mobile Routers	61
4.6. ARP, Proxy ARP, and Gratuitous ARP	62
5. Security Considerations	66
5.1. Message Authentication Codes	66
5.2. Areas of Security Concern in this Protocol	66
5.3. Key Management	67
5.4. Picking Good Random Numbers	67
5.5. Privacy	67
5.6. Replay Protection for Registration Requests	68
5.6.1. Replay Protection using Timestamps	68
5.6.2. Replay Protection using Nonces	69
6. Acknowledgments	71

A. Patent Issues	72
A.1. IBM Patent #5,159,592	72
A.2. IBM Patent #5,148,479	72
B. Link-Layer Considerations	73

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
