(21) Appl. No.: **09/968,628**

(22) Filed: **Oct. 1, 2001**

In one embodiment, an electronic device is used to authenticate an identity of a user to determine that the user is permitted to access restricted information on a server. In response to the electronic device authenticating the identity of the user, a software module on a computer operated by the user is permitted to access the restricted information. In another embodiment, an electronic device is used to authenticate an identity of a user. In response to the electronic device authenticating the identity of the user, the settings on a computer are altered to correspond to settings on the electronic device.
