Contents

Preface	vii
1. The Problem of Video Compression	1
1.1 Overview of Video Compression Techniques	3
1.2 Applications of Compressed Video	6
1.3 Image and Video Formats	8
1.4 Overview of the Book	12
2. The MPEG Video Compression Standard	15
2.1 MPEG Encoder and Decoder	15
2.2 MPEG Data Stream	18
3. The H.261/H.263 Compression Standard for Video Telecommunications	23
3.1 Picture Formats for H.261/H.263 Video Codecs	24
3.2 H.261/H.263 Video Encoder	25
3.3 H.261/H.263 Video Decoder	28
4. The XYZ Video Compression Algorithm	29
4.1 XYZ Compression Algorithm	29
4.2 XYZ Decompression Algorithm	32
5. The Discrete Cosine Transform	37
5.1 Behavior of the DCT	37
5.2 Fast One-dimensional DCT Algorithms	40
5.3 Two-dimensional DCT Algorithms	47
5.4 Inverse DCT Algorithms	50

5.5 Three-dimensional DCT Algorithms	51
6. Quantization	57
6.1 Defining an Invariant Measure of Error	58
6.2 Calculation of Transform Variances	62
6.3 Generating Quantizer Factors	65
6.4 Adding Human Visual Factors	67
7. Entropy Coding	73
7.1 Huffman Coding	73
7.2 Use of Entropy Coding in JPEG and MPEG	76
7.3 Adaptive Huffman Coding	78
8. VLSI Architectures of the XYZ Video Codec	83
8.1 Complexity of the Video Compression Algorithms	83
8.2 From Algorithms to VLSI Architectures	86
8.3 Classification of Video Codec VLSI Architectures	87
8.4 Implementation of the XYZ Video Compression Algorithm	90
8.5 Adaptive XYZ Codec Using Mesh Architecture	103
8.6 XYZ Codec Based on Fast 3D DCT Coprocessor	111
9. Experimental Results Using XYZ Compression	123
9.1 PC Implementation	124
9.2 MasPar Implementation	138
9.3 Non-adaptive XYZ Compression	144
10. Conclusion	151
Bibliography	155
Index	163

Preface

This book is on real-time video compression. Specifically, the book introduces the XYZ video compression technique, that operates in three dimensions, eliminating the overhead of motion estimation. First, video compression standards, MPEG and H.261/H.263, are described. They both use asymmetric compression algorithms, based on motion estimation. Their encoders are much more complex than decoders. The XYZ technique uses a symmetric algorithm, based on the Three-Dimensional Discrete Cosine Transform (3D-DCT). 3D-DCT was originally suggested for compression about twenty years ago, however at that time the computational complexity of the algorithm was too high, it required large buffer memory, and was not as effective as motion estimation. We have resurrected the 3D-DCT based video compression algorithm by developing several enhancements to the original algorithm. These enhancements made the algorithm feasible for real-time video compression in applications such as video-on-demand, interactive multimedia, and videoconferencing. The demonstrated results, presented in the book, suggest that the XYZ video compression technique is not only a fast algorithm, but also provides superior compression ratios and high quality of the video compared to existing standard techniques, such as MPEG and H.261/H.263. The elegance of the XYZ technique is in its simplicity, which leads to inexpensive VLSI implementation of a XYZ codec.

We would like to thank Jim Prince for conducting experiments in developing visually weighted quantizers for the XYZ algorithm, as well as a number of students from Florida Atlantic University, who participated in these experiments. We also want to thank Drs. Roy Levow, K. Genesan, and Matthew Evett, professors from Florida Atlantic University, Dr. Steve Rosenbaum from Cylex Systems, and Joshua Greenberg for constructive discussions during this project.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
