

new-media file along with **user information** to a **user media publishing website.**”

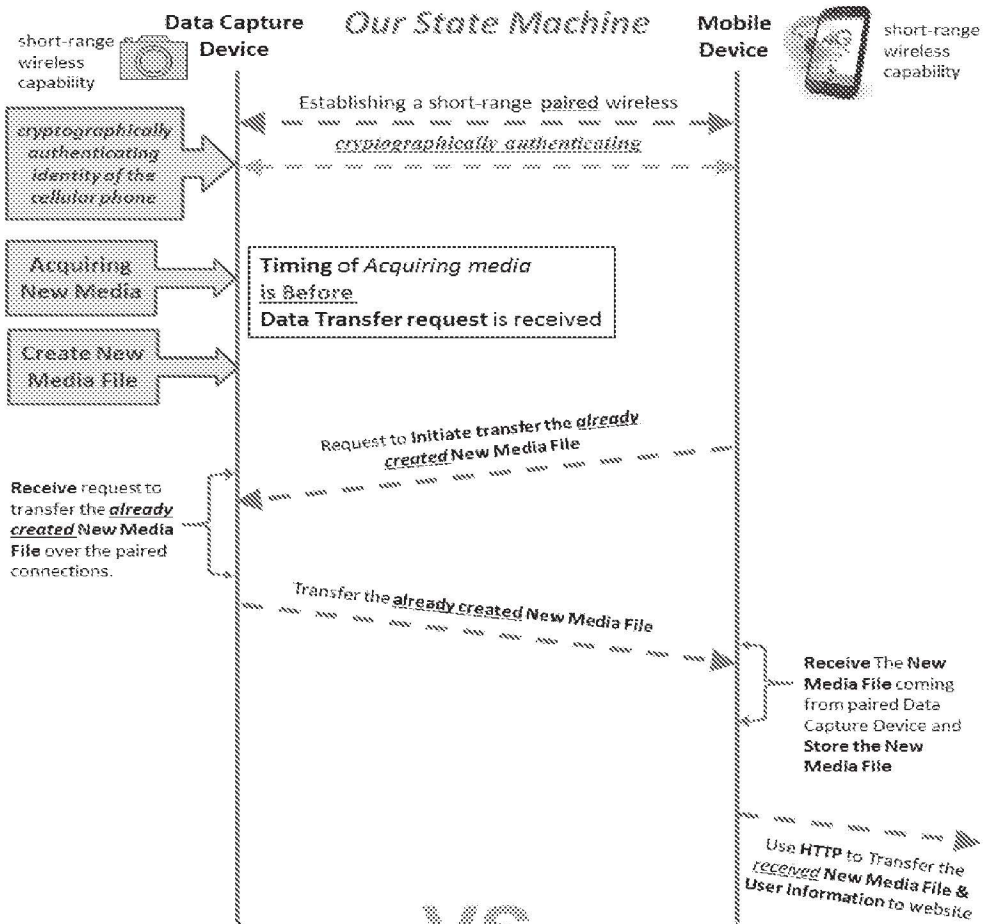

In view of the above arguments, applicant submits that even if Kennedy, King, Shiotsu and Pryor are combined as suggested in the office action, there is no expectation of satisfying applicant’s claim 1. Claim 1 is therefore non-obvious over Kennedy, in view of King, in view of Shiotsu, further in view of Pryor. Applicant therefore respectfully requests that the rejection of Claim 1 under 35 Pre-AIA U.S.C. 103(a) be reconsidered and withdrawn.

Claims 3, 4 and 9 are dependent on claim 1. Applicant therefore respectfully requests that the rejection of Claims 3, 4 and 9 under 35 Pre-AIA U.S.C. 103(a) be reconsidered and withdrawn.

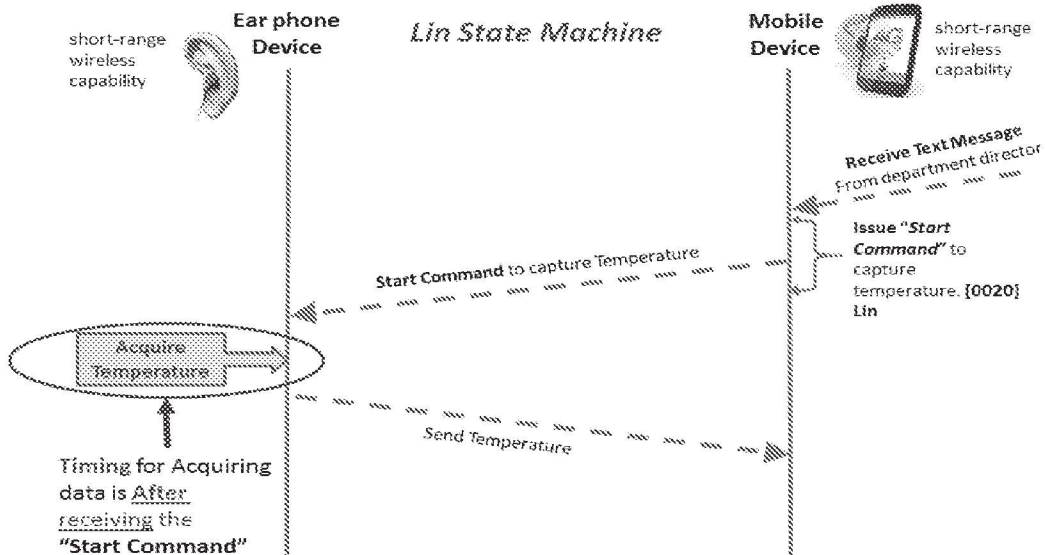

Next, the office action states: **“Claims 10, 12-13, 19, 21-26, 32-38 are rejected under 35 Pre-AIA U.S.C. 103(a) as being unpatentable over Kennedy-King-Lin-Pryor further in view of Ihara US 20120089538.”**

Lin Arguments

Argument 1: Digital camera device receiving a data transfer request from the cellular phone for the transfer of the new-media file created in the digital camera device (a) after the short-range paired wireless connection is established between the digital camera device and the cellular phone AND (b) before receiving the data transfer request (Applicant) vs NO data transfer request (Lin)

VS

Lin : Timing for Acquiring data is After receiving the "Start Command" from the Mobile device
 NOT the same as
 Our : Timing for Acquiring Data & Creating Media File is Before receiving a Data Transfer request from the Mobile device.

Claim 1 discloses that the digital camera device receives the data transfer request from the cellular phone for transferring the **new-media file** created in the digital camera device (a) **after** the short-range paired wireless connection is established between the digital camera device and the cellular phone **AND** (b) **before** receiving the data transfer request from the cellular phone. The cellular phone **initiates the transfer** of the **new-media file** from the digital camera device to the cellular phone (see page 7, lines 5-7 of applicant's original application: "*The client application 203 then initiates the transfer of the captured data, the multimedia content, and the associated files.*").

Lin teaches in paragraph [0020] that the local Bluetooth device **150** can automatically send out a start command SC for the Bluetooth earphone **100** to start with the process of measuring body temperature in order to receive the body temperature value T by the Bluetooth earphone **100**."

Paragraph [0023] of Lin discloses: "A Bluetooth earphone activates a temperature measuring procedure according to the start command inputted by a local Bluetooth device (step 310)."

Paragraph [0024] of Lin discloses: "Set the mobile phone to send a start command at a certain time to activate the Bluetooth earphone to execute body temperature measuring (step 420)."

Paragraph [0025] of Lin discloses: "the mobile phone automatically activates a pre-set timing for the Bluetooth earphone to **measure body temperature** (step 520)."

Further, Paragraph [0020] of Lin discloses: "Take the application of the Bluetooth mobile phone for example, a department director can choose to send a text message of measuring body temperature to the colleagues. After having received the text message, the mobile phone will issue a **start command SC** activating the Bluetooth earphone 100 to **measure the body temperature.**"

Therefore, in Lin, the measurement of temperatures by the earphone is triggered by the text message received by the cellular phone from an external source (the Director), which in turn causes the cellular phone to issue a start command to the earphone. In contrast, in applicant's method, the capture of the new-media by the digital camera device is **NOT triggered by receiving a Text Message on the cellular phone from an external source.** Further, in Lin, the **start command triggers "temperature measurement" by the earphone. Therefore it is NOT a "data transfer" request** from the cellular phone to the ear phone for the temperature measurements that were measured by the earphone **(a) after the short-range paired wireless connection is established between the ear phone and the cellular phone AND (b) before receiving the data transfer request.**

In Lin's disclosure, the Director is the Master that sends a text message to the cellular phone and the cellular phone in turn sends "Start Command to the earphone to capture temperatures". In applicant's method, the request is for **the new-data that has been captured by the digital camera device before receiving the data transfer request.**

In summary, in paragraphs [0020] [0023] [0024] [0025] Lin does not disclose that the earphone performs the following steps:

- (a) Establishing the short-range paired wireless connection with the cellular phone,
- (b) Acquiring the temperature measurements after establishing the short-range paired wireless connection, and
- (c) Receiving the data transfer request from the cellular phone that initiates the transfer of the temperature measurements, where the temperature measurements were performed (i) after the short-range paired wireless

connection is established between the ear phone and the cellular phone AND
(ii) before receiving the data transfer request.”

Combination of Kennedy-King-Lin-Pryor-Ihara

Applicant submits that Kennedy, in view of King, in view of Lin, further in view of Pryor does not teach all the limitations of claim 1.

Claim 1 : Limitation	Kennedy	King	Pryor	Lin
1 establish a paired short-range connection	NO mention of pairing. <i>Pairing is NOT established.</i>	Yes	NO mention of pairing	NO mention of pairing. <i>Pairing is NOT established.</i>
2 Cryptographically authenticate the identity of cellular phone	NO	NO <i>Biomertic</i> ≠ <i>Cryptographically</i>	NO	NO
3 receive a data transfer request initiated by a mobile software application on the cellular phone	NO <i>Initiated by the Camera and NOT Cellular phone</i>	NO	NO	NO <i>Start Capturing</i> ≠ <i>Data Transfer of already created data</i>
4 wherein the new-media file was created in the digital camera device before receiving the data transfer request	NO	NO	NO	NO <i>Start Capturing</i> ≠ <i>Data Transfer of already existing data</i>
5 use HTTP to transfer the received new-data and user information to a website over a cellular data network	NO HTTP is NOT used	NO HTTP is NOT used	Does NOT teach transferring received new-data along with user information to the website over cellular data network	NO HTTP is NOT used

As illustrated earlier in this response, Kennedy does not teach or suggest that a short-range **paired** wireless connection is established between the digital camera device

and the cellular phone, and **ONLY THEN** the digital camera device acquires “**new-media**”. It has also been illustrated earlier in this response that King does not teach or suggest that the **digital camera device cryptographically authenticates the identity of the cellular phone**.

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, further in view of Pryor does not teach or suggest the following limitations in claim 1:

“establishing a short-range **paired** wireless connection between the digital camera device and the cellular phone, wherein establishing the short-range paired wireless connection comprises, the **digital camera device cryptographically authenticating identity of the cellular phone;**”

“acquiring new-media, wherein the new-media is acquired **after** establishing the short-range **paired** wireless connection between the digital camera device and the cellular phone;”

Further, in the earlier part of this response, it has been illustrated that neither Kennedy nor Lin teach or suggest that the digital camera device receives the data transfer request from the cellular phone for transferring the **new-media file** that was created in the digital camera device (a) **after the short-range paired wireless connection is established between the digital camera device and the cellular phone** AND (b) **before receiving the data transfer request from the cellular phone**.

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, further in view of Pryor does not teach or suggest the following limitation in claim 1:

“receiving a data transfer request initiated by a mobile software application on the cellular phone, over the established short-range **paired** wireless connection,

wherein the data transfer request is for the **new-media file**, and wherein the new-media file was created in the digital camera device **before** receiving the data transfer request;”

Further, in the earlier part of this response, it has been illustrated that Kennedy does not disclose transfer of the **new-media** to the cellular phone, over the established short-range **paired** wireless connection.

Further, in the earlier part of this response, it has been illustrated that neither Kennedy nor Pryor teach or suggest uploading of **new-media received from the digital camera device** by the **cellular phone** along with the **user information** to the **user media publishing website** using HTTP.

Therefore, Kennedy in view of King in view of Lin further in view of Pryor does not teach or suggest the following limitation in amended claim 1:

“transferring the **new-media file** to the cellular phone, over the established short-range **paired** wireless connection, wherein the cellular phone is configured to **receive** the new-media file, wherein the cellular phone is configured to store the **received new-media file** in a non-volatile memory device of the cellular phone, and wherein the cellular phone is configured to use HTTP to upload the **received new-media file** along with **user information** to a **user media publishing website**.”

In view of the above arguments, applicant submits that even if Kennedy, King, Lin and Pryor are combined as suggested in the office action, there is no expectation of satisfying applicant’s claim 1. Claim 1 is therefore non-obvious over Kennedy, in view of King, in view of Lin, further in view of Pryor.

Page 11, lines 4-10 of applicant’s original application recite as follows: “The data transfer protocol module **201c** of the digital data capture device **201** transfers the

captured data, the multimedia content, and the associated files to the client application **203**. The data storage module **203d** stores the captured data, the multimedia content, and the associated files on the mobile device **202**. The user may also **set preferences on the mobile device 202 using the GUI 203e of the client application 203.**”

Page 11, lines 27-29 of applicant’s original application recite as follows: “. The user may also configure the client application **203** to automatically **delete the data, the multimedia content, and the associated files ...**”

From the above paragraphs, it is clear that in applicant’s disclosure the GUI on the cellular phone facilitates:

- (a) receiving of the created new-media file and the created associated file from the digital camera device, and
- (b) deleting the created new-media file and the created associated file.

The office action on page 8 states that Ihara teaches that it is well known to have a system to include graphical user interface GUI (see Ihara paragraphs [0076-0077] "GUI") in order to make uploading data more efficient (see Ihara paragraphs [0076- 0077]).

However, Kennedy, King, Lin, Pryor and Ihara, **either alone or in combination do not teach or suggest that the GUI is for the new-media file and the associated file “received” by the cellular phone from the digital camera device over the established short-range paired wireless connection.**

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara does not teach or suggest the following limitations in claims 10 and 21:

“... provide a graphical user interface (GUI) for the **received new-media file.**”

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara does not teach or suggest the following limitations in claims 12 and 22:

“... provide a graphical user interface (GUI) for the **received associated file.**”

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara does not teach or suggest the following limitations in claims 40 and 47:

“...GUI is for the **received new-media file ...**”

Note: The received new-media file and the associated file are files received by the cellular phone from the digital camera device over the short-range paired wireless connection.

Further, Kennedy, King, Lin, Pryor and Ihara, **either alone or in combination do not teach or suggest that the GUI is for deleting the created new-media file and the created associated file.**

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of **Ihara does not teach or suggest the following limitation in claims 19:**

“... receive input from the graphical user interface (GUI) to **delete the created new-media file.**”

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara does not teach or suggest the following limitation in **claims 45**:

“... receive input from the GUI to **delete the created associated file.**”

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara does not teach or suggest the following limitation in **claim 23**:

“... **delete the created new-media file** based on input received from the graphical user interface (GUI).”

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara does not teach or suggest the following limitation in claim 46:

“... **delete the created associated file** based on input received from the GUI.”

Applicant therefore respectfully submits that Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara does not teach or suggest the following limitations in claim 40 and 47:

“...GUI is for the **received new-media file** and to **delete the created new media file.**”

Furthermore, since the combination of Kennedy-King-Lin-Pryor does not teach all the limitations in Claim 1, the combination of Kennedy-King-Lin-Pryor-Ihara also does not teach all the limitations of Claim 1. Claims 10, 21 and 32 are synonymous with Claim 1. Therefore the combination of Kennedy-King-Lin-Pryor-Ihara does not teach all the limitations in Claims 10, 21 and 32. Claims 10, 21 and 32 are therefore non-obvious

over Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara. Applicant therefore respectfully requests that the rejection of Claims 10, 21 and 32 under 35 Pre-AIA U.S.C. 103(a) be reconsidered and withdrawn.

Claims 12, 13, 19 and 37 are dependent on claim 10. Claims 38 and 22-26 are dependent on claim 21. Claims 33-36 are dependent on claim 32. Since claims 10, 21 and 32 are non-obvious over Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara, dependent claims 12, 13, 19, 22-26, and 33-38 are also non-obvious over Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara. Applicant therefore respectfully requests that the rejection of dependent claims 12, 13, 19, 22-26, and 33-38 under 35 Pre-AIA U.S.C. 103(a) be reconsidered and withdrawn.

Next, the office action states: **“Claims 3-4, 9, 12-13, 19, 21-26, 32-38, and 40-47 are rejected for similar reason as stated above.”**

In response to the above rejection, applicant submits that Kennedy-King-Lin-Pryor further in view of Ihara do not teach all the limitations in claims 1 and 10. Claims 21 and 32 are synonymous with claims 1 and 10. Since the combination of Kennedy-King-Lin-Pryor-Ihara does not teach all the limitations in Claims 1 and 10, the combination of Kennedy-King-Lin-Pryor-Ihara also does not teach all the limitations of Claims 21 and 32. Claims 21 and 32 are therefore non-obvious over Kennedy, in view of King, in view of Lin, in view of Pryor, further in view of Ihara. Applicant therefore respectfully requests that the rejection of Claims 21 and 32 under 35 Pre-AIA U.S.C. 103(a) be reconsidered and withdrawn.

Claims 3, 4, 9 and 40 are dependent on claim 1. Claims 12, 13, 19, 37, 39, 43 and 45 are dependent on claim 10. Claims 38, 41, 44, 46, and 22-26 are dependent on claim 21. Claims 42, 47, and 33-36 are dependent on claim 32. Applicant therefore respectfully requests that the rejection of claims 3, 4, 9, 12, 13, 19, 22-26, 33-38, and 40-47 under 35 Pre-AIA U.S.C. 103(a) be reconsidered and withdrawn.

For the reasons stated above, applicant submits that even if the Six prior art references i.e., Kennedy, King, Lin, Pryor, Shiotsu, and Ihara are combined as suggested in the office action, the combination still does not teach or suggest all the limitations in applicant's claims. Therefore, applicant respectfully requests the rejection of claims under 35 U.S.C. 103(A) be reconsidered and withdrawn.

Conclusion

Applicant respectfully requests that a timely Notice of Allowance be issued in this case. In the interest of compact prosecution, if the prosecution of the application can be advanced or if a claim may be made potentially allowable by an Examiner's amendment, applicant requests Examiner Nooristany to call the undersigned with the proposed amendment.

Respectfully submitted,

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.
