Nokia 9000i Communicator Frequently Asked Questions

When and where will the Nokia 9000i Communicator be available in USA? The product will be available in GSM1900 Networks (North American GSM) during the 4th quarter of 1997. The price has yet to be determined.

Is the Nokia 9000i Communicator a laptop PC? No, it is an integrated digital communications tool. The Nokia 9000i Communicator runs its own operating system, Geos 3.0. Nokia 9000i is the first fully integated communications tool. It does not replace a PC, but it is a perfect companion for it.

What are the strategic measures of Nokia 9000i Communicator? See the specifications of the Nokia 9000i Communicator.

Where will I get Internet Access Point in order to be able to use the Internet application? You will get Internet Access Point from the major Internet Access Providers in your country.

How can I use data services e.g. SMS and fax? First of all you have to check if your operator does provide data services e.g. SMS, data and fax. In order to activate these services you will have to contact your GSM network operator.

Is it possible to connect from a Nokia 9000i Communicator to a PC and vice versa? Yes it is possible to connect from a Nokia 9000i Communicator to a PC with infrared (IrDA standard) or with the adapter cable DLR-1. In order to do this you have to use Nserver program, which comes with the sales packet.

What drivers do I need in order to have the Nokia 9000i Communicator and Windows 95 communicate via infrared? Download Windows infrared drivers for Windows 95 from Microsoft (www.microsoft.com) and you will get the device drivers from the diskette that comes with the sales packet.

Am I able to use the Nokia 9000i Communicator as a modem from my PC or laptop? Yes, via infrared. Choose Fax Modem from System application. Then check if the settings are correct and activate the Fax Modem.

Can I key in data while talking to the Nokia 9000i Communicator? Yes, when using hands free option you are able to do that. NOTE! In the Nokia 9000i Communicator all the applications are running simultaneously.
