RESPONSE

Mail Stop Amendment

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In response to the Office Action mailed **April 23, 2013** ("Office Action"), Applicants petition for one month extension of time and submit the following amendments and remarks in the above-identified application for consideration:

Amendments to the Specification begin on page 2 of this paper.

Amendments to the Drawings begin on page 3 this paper

Amendments to the Claims are reflected in the listing of claims beginning on page 4 of this paper.

Remarks/Arguments begin on page 10 of this paper.

It is believed that no extensions of time or fees for net addition of claims are required beyond those that may otherwise be provided for in documents accompanying this paper. However, if additional extensions of time are necessary to prevent abandonment of this application, then such extensions of time are hereby petitioned for under 37 C.F.R. § 1.136(a), and any fees required therefore (including fees for net addition of claims) are hereby authorized to be charged to our Deposit Account No. 033975 (Ref. No. 043311-0397949).

AMENDMENTS TO THE SPECIFICATION

Please replace the specification as originally filed with the **SUBSTITUTE SPECIFICATION** filed herewith. In accordance with 37 C.F.R. § 1.125, a clean version of the **SUBSTITUTE SPECIFICATION** is filed herewith, along with a marked-up version showing the changes made.

KEMBEL, *et al.* – To Be Determined
Attorney Docket No.: 043311-0397949

AMENDMENTS TO THE DRAWINGS

Please replace sheets 1-14 of the drawings as originally filed with the
REPLACEMENT SHEETS filed herewith.

CLAIM AMENDMENTS

This **listing of claims** will replace all prior versions, and listings, of claims in the application:

1-3. **(Cancelled)**

4. **(Currently Amended)** A client device, the client device comprising:

electronic storage having stored thereon a plurality of networked information monitor templates defining a plurality of networked information monitors, the plurality of networked information monitor templates comprising a first networked information monitor template defining a first networked information monitor, wherein the first networked information monitor template comprises:

(1) a content reference that comprises a network location at which content for the first networked information monitor is accessible via a TCP/IP protocol;

(2) a definition of a graphical user interface of the first networked information monitor that lacks controls for manually navigating a network, and that includes a frame within which the content received from the network location can be displayed, and frame characteristics defining one or more visual aspects on [[the]] an electronic display of the frame; and

(3) instructions configured (i) to cause the first networked information monitor to request the content from the network location in the content reference via the TCP/IP protocol, and (ii) to cause the first networked information monitor to generate the graphical user interface of the first networked information monitor with the content received from the network location via the TCP/IP protocol within the frame;

an electronic display; and

one or more processors configured to access the first networked information monitor template, and to execute the first networked information monitor template such

that the graphical user interface of the first networked information monitor is presented to a user on the electronic display having the content received from the content reference therein.

5. **(Original)** The client device of claim 4, wherein the first networked information monitor template further comprises control characteristics that define one or more controls that are usable by the user to interact with or control the first networked information monitor.

6. **(Original)** The client device of claim 5, wherein the control characteristics define visual representations of the controls that are included in the graphical user interface of the first networked information monitor.

7. **(Currently Amended)** The client device of claim 4, wherein the plurality of networked information monitor templates further comprises a second networked information monitor template defining a second networked information monitor, wherein the second networked information monitor template comprises:

(1) a second content reference that comprises a second network location, which is different from the network location in the content reference of the first networked information monitor template, at which content for the second networked information monitor is accessible via the TCP/IP protocol; and

(2) a definition of a graphical user interface of the second networked information monitor that lacks controls for manually navigating a network, and that includes a second frame within which the content received from the second network location can be displayed; and

(3) instructions configured (i) to cause the second networked information monitor to request content from the second network location in the second content reference via the TCP/IP protocol, and (ii) to cause the second networked information

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
