

ATTORNEY DOCKET NO.: 11381.110928
IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant:	Daniel R. Cohn et al.	Examiner:	Not Yet Assigned
Serial No.:	Not Yet Assigned	Art Unit:	Not Yet Assigned
Filing Date:	Filed Herewith	Confirmation No.:	Not Yet Assigned
Title:	FUEL MANAGEMENT SYSTEM FOR VARIABLE ETHANOL OCTANE ENHANCEMENT OF GASOLINE ENGINES		

PRELIMINARY AMENDMENT

Via EFS-Web
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

INTRODUCTORY COMMENTS

Please preliminarily amend the application as follows:

Application No.: Filed Herewith
Date: May 27, 2011

Docket No.: 11381.110928

In the Specification

Please amend paragraph [0001] on page 1 as follows:

This application is a continuation of United States Patent Application No. 12/815,842 filed June 15, 2010 which is a continuation of United States Patent Application No. 12/329,729 filed on December 8, 2008 which is a continuation of United States Patent Application No. 11/840,719 filed on August 17, 2007, which is a continuation of United States Patent Application No. 10/991,774, which is now issued as United States Patent No. 7,314,033.

In the Claims

1-56 (cancelled)

Please add the following new claims:

57. (new) A turbocharged or supercharged spark ignition engine which is fueled with gasoline and ethanol where ethanol is introduced into the engine in such a way that the vaporized cooling provided by the ethanol enhances the octane number more than it is enhanced by the intrinsic octane number of the ethanol.

58. (new) The turbocharged or supercharged spark engine of claim 57 where liquid ethanol is directly injected into the engine cylinders.

59. (new) The turbocharged or supercharged spark ignition engine of claim 58 where the ethanol is injected so as to have a greater concentration in the end gas region.

60. (new) The turbocharged or supercharged spark ignition engine of claim 59 where the ethanol has a higher concentration near the wall of the cylinder.

61. (new) The turbocharged or supercharged spark ignition engine of claim 60 further including swirl.

62. (new) The turbocharged or supercharged spark ignition engine of claim 59 where the knock resistance is increased relative to uniform distribution of ethanol in the cylinder.

63. (new) A turbocharged or supercharged spark ignition engine of claim 57 where the spark retard is changed to prevent knock from occurring when the ethanol energy fraction is reduced.

64. (new) A turbocharged or supercharged spark ignition engine where ethanol is introduced into the engine in such a way that it provides a 35 octane number increase over gasoline and the

octane number increase from vaporization cooling is greater than the octane number increase from the intrinsic octane of ethanol.

65. (new) The turbocharged or supercharged spark ignition engine of claim 64 where liquid ethanol is directly injected into the engine cylinders.

66. (new) The turbocharged or supercharged spark ignition engine of claim 64 where the ethanol is injected so to have a greater concentration in the end gas region.

67. (new) The turbocharged or supercharged spark ignition engine of claim 64 where the ethanol has a higher concentration near the wall of the cylinder.

68. (new) The turbocharged or supercharged spark ignition engine of claim 64 further including swirl.

69. (new) The turbocharged or supercharged spark ignition engine of claim 64 where the knock resistance is increased relative to uniform distribution of ethanol in the cylinder.

70. (new) A turbocharged or supercharged spark ignition engine of claim 64 where the spark retard is changed to prevent knock from occurring when the ethanol energy fraction is reduced.

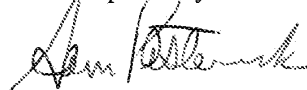

Application No.: Filed Herewith
Date: May 27, 2011

Docket No.: 11381.110928

Remarks

Claims 1-56 have been cancelled. New claims 57-70 are being added. No new matter is being introduced.

Respectfully Submitted,

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
