Docket Number: 17381ROUS01P**USE ONLY FOR FILING A PROVISIONAL APPLICATION FOR PATENT**

This collection of information is required by 37 CFR 1.51. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 8 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

PROVISIONAL PATENT APPLICATION
SUBMITTED ON SEPTEMBER 30, 2004

TITLE:

**SYSTEM AND METHOD FOR CLOSED LOOP MIMO PRE-CODING AND
FEEDBACK**

INVENTORS:

MING JIA, OTTAWA, ONTARIO CANADA

WEN TONG, OTTAWA, ONTARIO CANADA

PEIYING ZHU, KANATA, ONTARIO CANADA

SYSTEM AND METHOD FOR CLOSED LOOP MIMO PRE-CODING AND FEEDBACK

The present invention generally relates to closed loop MIMO (Multiple Input Multiple Output) pre-coding and feedback, and more specifically to closed loop MIMO pre-coding and feedback for purposes of the IEEE 802.16(e) and IEEE 802.11(n) standards.

BACKGROUND OF THE INVENTION

As will be apparent to one of skill in the art there are numerous problems with the current IEEE 802.16(e) standard that need to be resolved including:

- [1] MIMO channel feedback bandwidth reduction
- [2] Antenna group selection
- [3] MIMO channel feedback ageing
- [4] Vector quantization for the MIMO channel
- [5] MIMO feedback flow control associated MAC design
- [6] Feedback channel design
- [7] Feedback STC coding and channel sounding

While several solutions have been proposed in IEEE802.16(e) and IEEE802.11(n) for the closed loop MIMO pre-coding transmission, they are not practical for the following reasons:

[1] The Hausholder transform based SVD beam former feedback: The problem with this approach is that it is too complex for mobile channel realization

[2] Single user based fixed sub-channel allocation: The problem with this approach is that it has 2~3 times capacity loss compared to multi-user diversity

[3] Receiver based vector channel quantization: The problem with this approach is that it exponentially increases terminal complexity

A need exists therefore for an improved system and method for enabling closed loop MIMO pre-coding and feedback.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
