(57) **ABSTRACT**

Methods and systems provide a "chart view" for a markup language referred to as Reusable Data Markup Language ("RDML"). Generally, a chart view comprises the components necessary for automatically manipulating and displaying a graphical display of numerical data contained in RDML markup documents. RDML is a markup language, such as the Hypertext Markup Language ("HTML") or the Extensible Markup Language ("XML"). Generally, RDML facilitates the browsing and manipulation of numbers, as opposed to text as in HTML, and does so by requiring attributes describing the meaning of the numbers to be attached to the numbers. Upon receiving RDML markup documents, the chart view transforms, formats, manipulates and displays data stored in the markup documents using the attributes describing the meaning of the data. The chart view uses the attributes of the numbers to, for example, facilitate the simultaneous display of different series of numbers of different types on a single chart and automatically display appropriate axis labels, axis titles, chart titles, number precision, etc. A chart view may be a component of a data viewer used to retrieve, manipulate, and view documents in the RDML format.

The screenshot shows a software application window with a menu bar at the top containing 'File', 'View', 'Tools', 'Help', and 'Copy Down'. Below the menu bar are three main sections:

- Select an element:** A list of radio buttons for selecting an element:
  - LI Title
  - LI Category
  - Y Axis Title
  - Level
  - Formal
  - Precision to Percent
  - LI Footnotes
  - LI Description
  - Precision
  - Unit
  - Magnitude
  - Modifier
  - Measure
  - Scale
- Select an operator:** A list of radio buttons for selecting an operator:
  - \$,###,(\$,###)
  - \$,###,(\$,###)
  - (0,0)
  - (0,000)
  - (0,0)
  - (%,(0.00%))
  - (0,0)
  - (%,(0%))
- Fill Column Defaults:** A table with the following columns: 'Formal', 'Y Axis', and 'In Thousands'. The rows contain various categories and their corresponding values and units.

At the bottom of the window, there are tabs for 'Data Sources', 'Line Items', and 'Table Status'. The 'Line Items' tab is currently selected, showing a list of items with their respective values and units.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
