**PETITIONER'S EXPLANATION OF PARALLEL PETITIONS AND  
RANKING OF PETITIONS  
FOR U.S. PATENT NO. 7,447,686**

## Petition for *IPR* of U.S. Patent 7,447,686

Petitioners provide this Explanation of Parallel Petitions and Notice of Ranking of Petitions pursuant to the July 2019 Update of the Trial Practice Guide. U.S. Patent No. 7,447,686 (the “’686 patent”) is subject to a pending lawsuit entitled SAS Institute Inc., v. World Programming Limited, et. al., Case No. 2-18-cv-00295 (E.D. Tex.) (the “Litigation”) in which Petitioner World Programming Limited is a defendant. The ’686 Patent has 50 claims. Ex. 1001, claims 1-50. In the Litigation, Patent Owner asserted all 50 claims of the ’686 Patent. Given the number of claims being asserted, it is impossible for Petitioner to address all of the claims in just one petition. Petitioner therefore has concurrently filed two Petitions (“Petition 1” and “Petition 2”) relating to the ’686 Patent, which in combination address claims 1-40, 43-48, and 50. Thus, the present circumstance is consistent with the example in the July 2019 Update of the Trial Practice Guide, which states that “the Board recognizes that there may be circumstances in which more than one petition may be necessary, including, for example, when the patent owner has asserted a large number of claims in litigation.”

Although Petitioner believes that its two petitions are both meritorious and justified in light of the number of claims being asserted by Patent Owner in the Litigation, Petitioner requests that the Board consider the petitions in the following order:

Petition for *IPR* of U.S. Patent 7,447,686

<b>Rank</b>	<b>Petition</b>	<b>Grounds and References</b>
1	Petition 1	Ground 1: InterViso and Selvaraj
2	Petition 2	Ground 1: InterViso and Selvaraj

Below are some of the material differences between the two petitions:<sup>1</sup>

1. **Petition 1:**

- a. Ground 1 – Claims Challenged: **1-12** and 46-48

2. **Petition 2:**

- a. Ground 1 – Claims Challenged: 13-40, 43-45, and 50

As shown above, the grounds set forth in the concurrently filed petitions are not redundant and are materially different because the claims being challenged in each petition differ, with dependent claims being challenged in Petition 2 that are not challenged in Petition 1. A summary of the similarities and material differences between Petitions 1 and 2 are identified in the table below.

---

<sup>1</sup> Independent claims are bolded.

Petition for *IPR* of U.S. Patent 7,447,686

<b>Grounds</b>	<b>Petition 1</b>	<b>Petition 2</b>
Independent Claims Being Challenged: claim 1	✓	
Dependent Claims Being Challenged: claims 2-12 and 46-48	✓	
Dependent Claims Being Challenged: claims 13-40, 43-45, and 50		✓
Obviousness Combination and Motivation to Combine InterViso and Selvaraj	✓	✓

The Board should consider both petitions and not exercise its discretion to deny institution in either IPR given the number of claims being asserted by the Patent Owner in the Litigation. And as shown above, the two petitions are not redundant, and the differences between the two petitions are material given the different dependent claims being challenged.

Petition for *IPR* of U.S. Patent 7,447,686

Respectfully submitted,  
BAKER BOTTS L.L.P.

**LEAD COUNSEL FOR PETITIONER**

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
