Internet Archive
300 Funston Avenue
San Francisco, CA 94118

AFFIDAVIT OF CHRISTOPHER BUTLER

1. I am the Office Manager at the Internet Archive, located in San Francisco, California. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to surf more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a list of available dates. The visitor may select one of those dates, and then begin surfing on an archived version of the Web. The links on the archived files, when served by the Wayback Machine, point to other archived files (whether HTML pages or images). If a visitor clicks on a link on an archived page, the Wayback Machine will serve the archived file with the closest available date to the page upon which the link appeared and was clicked.

4. The archived data made viewable and browseable by the Wayback Machine is compiled using software programs known as crawlers, which surf the Web and automatically store copies of web files, preserving these files as they exist at the point of time of capture.

5. The Internet Archive assigns a URL on its site to the archived files in the format `http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]`. Thus, the Internet Archive URL `http://web.archive.org/web/19970126045828/http://www.archive.org/` would be the URL for the record of the Internet Archive home page HTML file (`http://www.archive.org/`) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). A web browser may be set such that a printout from it will display the URL of a web page in the printout's footer. The date assigned by the Internet Archive applies to the HTML file but not to image files linked therein. Thus images that appear on a page may not have been archived on the same date as the HTML file. Likewise, if a website is designed with "frames," the date assigned by the Internet Archive applies to the frameset as a whole, and not the individual pages within each frame.

6. Attached hereto as Exhibit A are true and accurate copies of printouts of the Internet Archive's records of the HTML files for the URLs and the dates specified in the footer of the printout.

7. I declare under penalty of perjury that the foregoing is true and correct.

DATE: 5/15/19

Christopher Butler

CALIFORNIA JURAT

See Attached Document.

A notary public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy, or validity of that document.

SunWorld Online

New or updated products for advanced systems computing

Directory for the month of December 1995

Edited by **John J. McLaughlin**, FlashBack, Inc.

This page is an **index** of December's new product listings. Each week we post a page with the latest new products. The most recent entries are marked here with the bright yellow "new" flag. Click on an entry to go to the page containing detailed information for that product (and other products posted that week).

See our [backissues index](#) for a full listing of previous month's new products.

Attention vendors: [Here's how to get your products mentioned in SunWorld Online.](#)

December index

Table of Contents

Hardware

[AL-D210 & AL-D220](#) tape drive autoloaders
[Apex 4.6 GigaByte 5.25" rewritable optical drive](#) removable storage solution
[CLARiiON Model C155](#) rackmount disk array
[GD-8000 Drive Family](#) 4mm DDS-2 tape drive
[LightningArray](#) RAID disk array subsystem
[MicroArray](#) 5GB RAID in a standard 5.25" drive bay
New! [Models S440 & S450 Array storage subsystems](#) SCSI RAID systems
[M.T. 5600 Automated Tape Library, 5498 tape drive & 5499 controller](#) automated storage solution
[PCI Serial HIPPI NIC](#) parallel interface network interface card
[Portmaster ISDN Communications Server](#) 20 B-channels + router
[Portmaster ISDN Office Router](#) single ISDN port + router capability
[PowerHub 4100](#) multi-protocol fast ethernet switch for 100BaseT
[Powerlink128 ISDN Modem](#) ISA bus ISDN modem card
[RAIDstack](#) series of fault-tolerant RAID disk arrays
[scsiMODEM Server](#) PCMCIA-based modem server w/ SCSI interface
[UWS1/140](#) UltraSPARC-based workstation
New! [Xcelerator](#) caching I/O controller

Software

[AIMS](#) Internet service provider all-in-one solution
New! [Compatibility Server](#) recipient-based mail transformation utility
New! [ComponentWare Database Component](#) CORBA and Windows OLE access to UNIX databases
New! [DataGlyph Software Developer's Kit](#) SmartPaper generation system
[EquationBuilder](#) NeXTStep equation editor
[Great Circle](#) automatic memory manager for C and C++
[ICONIX CASE Powertools](#) software design and engineering
[Informix Web Interface Kits](#) adapts INFORMIX-4GL and INFORMIX-ESQL to the Web
[InterViso 3.0](#) object-oriented database interface and connectivity system
[MOVE](#) automated inventory control
New! [OpenWrite 2.0](#) NeXTStep word processing
[ORBeline 2.0](#) object request broker
[Ovation](#) presentation software
[Persistence 3.0](#) object-to-relational application development system
[PMDF e-Mail Intereconnect for Solaris](#) replacement for sendmail
[PSpice, PSpice A/D, and Optimizer](#) simulation and analysis tools
[QSTAR CD Master & MasterMind](#) supports CD-R and CD-ROM jukeboxes
[Razor](#) configuration management and problem tracking
[RetrievalWare](#) pattern recognition and semantic search for Netscape server
[SDDGen](#) support documentation for source code
[SIAD \(Automatic Document Indexation System\)](#) flexible document management
[SmartWare PLUS](#) WWW toolset extension to SmartWare PLUS
[Spider 1.5](#) WWW/database application development
New! [Stalker 2.0](#) Unix system monitoring and intrusion detection
New! [TeraFile](#) files of limitless size

[USoft Report Series](#) object-oriented report writer for server/client apps
[Webcall](#) telephone callback server interface for WWW

Books

[Civilizing Cyberspace](#) Policy, Power, and the Information Superhighway

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
