

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

MICROSOFT CORPORATION,
Petitioner,

v.

UNILOC 2017 LLC,
Patent Owner.

U.S. Patent No.: 6,836,654

Issued: Dec. 28, 2004

Application No.: 09/739,507

Filed: Dec. 18, 2000

Title: ANTI-THEFT PROTECTION
FOR A RADIOTELEPHONY DEVICE

DECLARATION OF TIMO HENTTONEN

MICROSOFT CORP.
EXHIBIT 1014

1. I, Timo Henttonen, state and declare as follows:
2. I am over 18 years of age and am competent to make this Declaration.

I make this Declaration based on my own personal knowledge.

3. I am presently employed as a Director of IC Packaging / Silicon Development at Microsoft Corporation in Sunnyvale, California. I became an employee of Microsoft as a result of Microsoft's acquisition of certain divisions of Nokia Corporation, my previous employer.

4. I was originally hired as an electronics design engineer by Nokia in November 1995. One of my first projects at Nokia was as a member of the team responsible for developing the mobile phones known as the Nokia 9000 Communicator and Nokia 9000i Communicator. I was a member of this team until the fall 1996, when I joined another Nokia team working on the next generation of the Communicator through 1997. Thus, during this late 1990s time period, I became familiar with each of the Nokia Communicator devices, including the owner's manuals that were distributed with these devices and Nokia's efforts at marketing these devices worldwide. I continued working for Nokia through 2014, when Microsoft acquired my division, and I maintained significant knowledge of the Nokia Communicator products throughout that time.

5. Attached hereto as Ex. 1003 is a true and correct copy of the Owner's Manual for the Nokia 9000i Communicator, which describes the functionality and operation of the device.

6. Nokia first sold the Nokia 9000i Communicator in North America, including the United States by at least November 1997. This is confirmed by press from that time period, which is consistent with my recollection of my personal experience with the product and its commercialization. *See, e.g.*, Ex. 1004, attached hereto ("The Nokia 9000i Communicator, which combines digital voice and data services and personal organizer functions, was first made commercially available in North America in October 1997 by GSM 1900 personal communications services (PCS) carriers."); *see also, e.g.* Ex. 1005, attached hereto ("Nokia introduces the new Nokia 9000i Communicator for GSM Markets," dated November 5, 1997). This press also confirms my recollection that Nokia widely publicized the release of the 9000i Communicator device.

7. Beginning no later than November 1997, Nokia provided a copy of an Owner's Manual for the Nokia 9000i Communicator (Ex. 1003) with each device that was sold worldwide. By December 1, 1998, at least thousands of copies of Ex. 1003 had been distributed to customers in the United States.

I, Timo Henttonen, do hereby declare and state, that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
