v.

Uniloc 2017 LLC,

IPR2020-00023

U.S. Patent No. 6,467,088

Before Sally C. Medley, Miriam L. Quinn,
Scott Raevsky, Administrative Patent Judges

Oral Hearing
January 15, 2021

Overview of the '088 patent

In a preferred embodiment, the '088 patent solves certain computer-problems of its time (over two decades ago) through use of a novel reconfiguration manager 10, which is described in part with reference to Figure 1, reproduced below:

Challenged Claims

The Petition purports to challenge claims 1–4, 6–14, and 16–21 of 6,467,088.

Three of the challenged claims are written in independent form—i.e., claims 1, 11 and 21.

The text of the three independent claims are reproduced in the slides that follow.

Petitioner challenges claims 1–4, 6–14, and 16

1. A processor-implemented method for controlling the reconfiguration of an electronic device, the method comprising the steps of:

receiving information representative of a reconfiguration request relating to the electronic device;

determining at least one device component required to implement the reconfiguration request;

comparing the determined component and information specifying at least one additional component currently implemented in the electronic device with at least one of a list of known acceptable configurations for the electronic device and a list of known unacceptable configurations for the electronic device; and

generating information indicative of an approval or a denial of the reconfiguration request based at least in part on the result of the comparing step.

Petitioner challenges claims 1–4, 6–14, and

21. An article of manufacture comprising a machine-readable medium containing one or more software programs which when executed implement the steps of:

- receiving information representative of a reconfiguration request relating to an electronic device;**
- determining at least one device component required to implement the reconfiguration request;**
- comparing the determined component and information specifying at least one additional component currently implemented in the electronic device with at least one of a list of known acceptable configurations for the electronic device and a list of known unacceptable configurations for the electronic device; and**
- generating information indicative of an approval or a denial of the reconfiguration request based at least in part on the result of the comparing step.**

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
