(57) **ABSTRACT**

A web based software system generally designed for processing pre-employment background investigations is described. The software system allows an organization the ability to create and customize electronic documents to be sent to their applicants to complete via the web based software system, and returned in the same fashion. The subject matter turns much of a common pre-employment background investigation electronic, so that fewer hardcopy documents are necessary, thus creating more efficient management of individual background investigations.

The screenshot shows the SOPH website interface. At the top, there is a navigation bar with links for 'HOME', 'ABOUT', 'SERVICES', and 'HELP/FAQ'. Below the navigation bar, there is a search area with a text input field and a search button. The main content area displays a table of patent records. The table has the following columns: 'Patent Name', 'Active From', 'Active Through', 'Status', 'Priority Date', 'Priority Sequence', and 'Serial Number'. The table contains 12 rows of data, each representing a different patent.

Patent Name	Active From	Active Through	Status	Priority Date	Priority Sequence	Serial Number
