## Efficient hiring of top-quality personnel for law enforcement has never been more critical.

*Which means there's no room for cutting corners or wasting efforts in your extensive processes for hiring new recruits.*

**Background Assistant** is a purpose-built, state-of-the-art web-based application developed by experienced law enforcement professionals with more than four decades of experience training agencies of all types and sizes.

Designed specifically for law enforcement hiring, to help you quickly and efficiently gather, manage and process the important background information you need to make vital hiring decisions. Background Assistant provides a complete investigation and screening tool that delivers measurable improvement and results.

**As a result, you can make hiring decisions faster, easier, with greater consistency and confidence.**

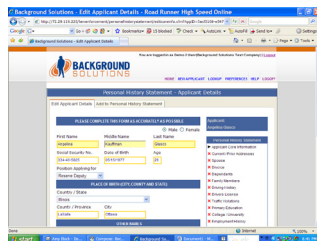

*Background Assistant gives you a streamlined approach to evaluating prospective recruits that results in greater consistency, improved cost efficiencies and enhanced information for better*

In law enforcement hiring,  
we started with a blank sheet of paper  
*to create a tool that eliminates redundancies,  
improves information sharing and lets you  
focus on hiring decisions.*

**You know the challenge.** Gather a vast amount of information from a variety of sources, keep track of constantly changing details, assemble it all into some form of meaningful report, and then use it all to make an informed and supported hiring decision.

You have notes here, phone numbers jotted down there, names of persons to contact in a separate list, and tons of other information – including applicant information – that need to be entered, tracked, logged and processed.

*And then you start the background investigation process all over again for each and every applicant.*

At **Background Solutions, L.P.** we have leveraged nearly 40 years of experience in the field of law enforcement applicant screening to create an entirely new, streamlined approach that helps you manage the law enforcement hiring process in a consistent manner. The quality and reputation of your organization depend on the recruits you hire.

## Every feature designed to **deliver maximum benefit**

**Background Assistant** reduces the impact of high employee turnover rates by ensuring complete and consistent background investigations on every applicant.

**Save Time** – Once data is entered or changed anywhere in the application, it is automatically reflected throughout the entire case file. Current users report that reducing repetitive manual entry has cut their investigation times by up to 40%.

**Fully Automated** – From applicant data entered online to automatic receipt and storage of responses, Background Assistant uses advanced data management technology to eliminate redundancy and speed the screening process.

**Cost Savings** – Web-based computer automation simplifies data collection and processing, shortening screening times and eliminating redundant steps. Reducing time spent on manual data entry results in cost savings to your agency and allow you to more efficiently deploy your personnel.

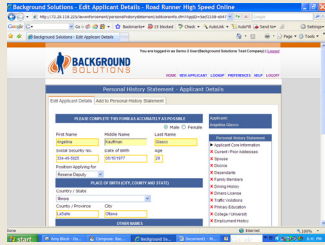

**Highly Intuitive** – The easy-to-use interface allows you to quickly and easily access information, manage records and generate reports. Minimal training is required to gain maximum productivity.

**Security** – All data is highly secure, accessible only by your agency. You appoint a system manager that can easily assign cases and monitor the progress of all screening processes.

**Experience** – Background Assistant was developed by law enforcement officers with decades of law enforcement experience in background

## Significantly reduce the time spent on background investigations!

*Greater productivity is just a few mouse clicks away*
