Primary Examiner—Douglas W. Olms*Assistant Examiner*—Alpus H. Hsu*Attorney, Agent, or Firm*—Daniel R. Collopy; William
 E. Koch; Thomas G. Berry[57] **ABSTRACT**

A signalling protocol comprising a plurality of interleaved phases is transmitted at various baud rates, the various baud rates being multiples of a base baud rate. The signalling protocol allows a selective call receiver to decode at an operating baud rate equivalent to the base baud rate irrespective of the transmission baud rate by decoding only a portion of the transmitted signal, the portion decoded determined by the baud rate and the address of the selective call receiver.
