(57) **ABSTRACT**

In a method of displaying video data using an embedded media player page, frame dimensional data for a first video file is received from a database **106**. The database **106** includes frame dimensional data indexed therein for a plurality of video files. The plurality of video files includes the first video file, and the plurality of video files is retrievable from at least one video server **104** through a communications network **114**. A media player is launched within the embedded media player page. A video display area of the media player is sized based upon the received frame dimensional data. The video data from the first video file is displayed within the video display area.
