Teleflex’s reduction-to-practice case balances on assumptions about Exhibit 2024 and a presumption of its reliability. Teleflex witnesses assume that Exhibit 2024 is what Teleflex claims, and then offer *additional* assumptions regarding VSI’s prototype efforts. This is not a “goes to weight” case. If Teleflex cannot prove that Exhibit 2024 is what it claims—a document created on August 24, 2005, and addressing RX as of that date—its witnesses’ assumptions regarding the document are irrelevant.

Teleflex argues against excluding Exhibit 2024 because, according to Teleflex, Exhibit 2024 is “highly relevant” and “potentially case-dispositive.” PO’s Opposition at 1. But a document’s purported relevance does not obviate its proponent’s authentication obligations. Teleflex does not dispute that some critical information is missing from the document on its face and from the document’s metadata. Instead of providing that missing information, however, Teleflex offers only its witnesses’ opinions on the relevance and purpose of the document and other records *like* it.

I. TELEFLEX CONFUSES WITNESS ASSUMPTIONS AND OPINIONS ABOUT THE DOCUMENT FOR FACTS AUTHENTICATING THE DOCUMENT.

None of Teleflex’s purported authenticating witnesses offer evidence sufficient to prove that Exhibit 2024 is what Teleflex claims: a document created on August 24, 2005, addressing GuideLiner RX as of that date. Teleflex in fact *reverses*

the authenticity analysis. It looks through the wrong end of the telescope. A witness does not authenticate a document if she understands what the document might represent *assuming the document is what she believes*. A witness authenticates a document by having personal knowledge of its creation and maintenance (see Section III, *infra*), by providing information showing what the document is, and by confirming that the document is reliable. Fed. R. Evid. 901.

Teleflex assumes Exhibit 2024’s “authenticity” using information it pulls from the face of the document. *See, e.g.*, PO’s Opposition at 2 (“As shown on the face of the document, Exhibit 2024 is . . .”). Indeed, Teleflex argues that because the “August 24, 2005 date of this document is consistent throughout,” it must be accurate. PO’s Opposition at 2. But Exhibit 2024 is not self-authenticating. *See* Fed. R. Evid. 902. And further, the document supplies only indicia of *unreliability*. Motion to Exclude at 2-5. Teleflex does not dispute that Exhibit 2024 is missing critical information, including: (1) a reliable, non-hearsay date; (2) an author; (3) an “RX” file name; and (4) content. Nothing and no one supplies this missing information.

II. NO WITNESS SPEAKS TO EXHIBIT 2024’S CREATION OR MAINTENANCE—NO ONE ESTABLISHES THAT IT IS A RELIABLE “BUSINESS RECORD.”

Teleflex suggests that the Board should consider Exhibit 2024 because it is a business record. Yet Teleflex offers no witness to speak to the document’s creation

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
